BTH-200 User Manual

1.INTRODUCTION
Cell phone headsets aren't just a convenience. If you happen to live in an area that bans the use of mobile phones without a headset while driving, they're a necessity. Whether you're behind the wheel or walking down the street, a headset frees up your hands to let you do whatever you need to do.

The Bluetooth Headset BTH-200 provides stability, comfort, and quality sound. It features a soft flexible ear hook that can be worn on either ear, or a noise-canceling microphone for call clarity in most environments. The BTH-200 is compatible with most headset-ready phones and mobile devices.
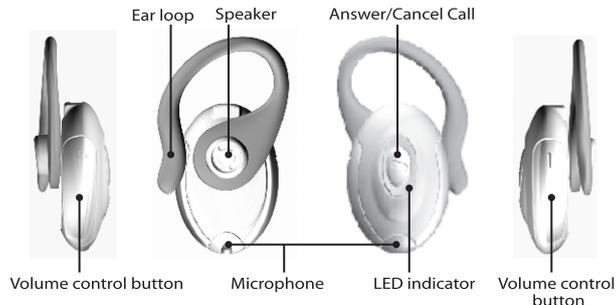

1.1 Unpacking BTH-200
Your Bluetooth Headset is shipped in a standard package containing the following items as show in the figure below:
■ Bluetooth Headset   ■ AC adaptor   ■ User manual

1.2 Headset overview

Ear loop   Speaker   Answer/Cancel Call

Volume control button   Microphone   LED indicator   Volume control button

1.3 Product Features -
- Bluetooth Technology up to 10 meters wireless transmission range
- Direct answers remote voice dialing
- Rechargeable battery
- Adjustable ear hook for both right-ear listener or left-ear listener
- Compatible with the most Bluetooth enabled cellular phones
- Headset profile and hands-free profile.

1.4 How to Start -
Before you can use your headset you must first:
- Charge the headset battery, using an appropriate charger
- Pair the headset with a device for example, a mobile phone.

2.CHARGING ──────────────────
The headset comes with a built-in rechargeable battery. To fully charge the battery for first time, it will take up to 4 hours, after that it takes 2 hours to get fully recharge. The talking time for a fully charge battery is 3.5 hours, standby time is up to 100 hours. When the battery is charging, the LED indicator shows a steady blue light. Charge the headset battery, using provided charger. Use other charger may damage the battery and headset.

3.WEARING THE HEADSET ──────────
The design of the Bluetooth Headset is very flexible and convenient. The factory defaults and the instructions in this manual are for wearing the headset on the right/left ear. Follow these steps:

❶ Pull the ear hook

❷ Loop the ear hook behind your ear as show and press the headset to your ear.

❸ Point the microphone toward your mouth.

4.CHANGE THE INSTRUCTION ──────────

❶ Remove Bluetooth headset from either side of ear.

❷ Start change over.

❸ Remove rubber cushion.

❹ Remove hook.

❺ Change the way replace on the Bluetooth headset.

❻ Replace rubber cushion on.

❼ Complete the exchange. Put on ear.

5. TURN THE HEADSET ON/OFF ──────────

5.1 To turn the headset on - - - - - - - - - - - - - - - - - -
Press and hold the answer / cancel call button ⏻ 3 seconds until you see a quick flash of **blue LED light**. After that the LED will flash every two seconds. (When battery is low it will flash red indicator light)

5.2 To turn the headset off - - - - - - - - - - - - - - - - - -
Press and hold the answer / cancel call button ⏻ 3 seconds until you hear two short tones followed by three quick flash of **red indicator light** then stop flash. The headset switches off and LED will stop flash.

6. PAIRING

Before the headset can be used with your mobile phone, it must first be paired. This process registers the headset and your mobile phone to each other. Pairing is necessary to establish a connection between Bluetooth enable devices. Your headset only needs to be paired once with each mobile phone that you use; however, its unique design enables you to pair it with other mobile phones. After pairing, you can use the headset to receive and initiate phone calls without additional configuration.

6.1 Pairing the headset with a phone

The Bluetooth Headset has passed the compatibility test and can be used with most mobile phones from Nokia, Sony Ericsson, Siemens, Motorola and Philips. Once you have hair your headset with the phone, you do not need to pair it again. (Note: Except Nokia Phone)

1. After turning on the headset, continue pressing the talk key down until the both red and blue LED flashing, indicating the headset is ready to be connected to the wireless device for the first time.
2. Select "Bluetooth" on your mobile phone.
3. Select "Search for devices".
4. Select"cellbird" from the option list;
   "Connecting to…"appears on the screen. Select "Enter Pass code".
5. Enter **"0000"** (the default pass code for Cellbird), and then press "OK". You can see the Blue LED light will quick flash twice every two second once the pairing is successful

Note: If your headset doesn't set under the pair mode, your Bluetooth mobile phone will not be able to find the headset, so the headset must set on the pairing mode.
If the headset doesn't pair up with mobile phone within one minute, the headset will turn off automatically, the previous pair will not work, you will need to repeat steps from 1 to 3 until it success.

7. MAKING AND ANSWERING CALLS

Once you have success to pair the headset with your phone, you can make and receive calls using the headset as long as it is turned on and with in range of the phone. For best performance, use the headset and phone in the same room.

7.1 To make a call using voice dialing

If your mobile phone supports the voice dialing function, you can make a voice call through the headset. Say a name or voice command to place a phone call. This function is especially convenient and safe when you are driving. However, it depends on your mobile phone supporting function. Refer to the mobile phone's user manual to see if the voice dialing function is supported.

7.2 To make a call using number pad

You can place a phone call with your headset linked to your mobile phone. Use your mobile phone to dial the desired number, and then use the Bluetooth Headset to talk and listen to the caller. If you want to use your mobile phone to talk / listen, disconnect the paired link between the headset and the mobile phone.

7.3 To answer a call using the call handling button
- When the headset rings, press the call handling button.
- To adjust volume press + to increase volume or press – to decrease volume.
- End the call by pressing the call handling button.

7.4 To activate/cancel mute function
- Press volume + and – at the same time for two seconds will activate mute function.
- Press volume + or volume – for over two second will cancel the mute function.

7.5 To reject a call
When the headset rings, press and hold the call handling button until you hear a long beep.

7.6 To adjust the volume
You can adjust the headset speaker volume during a call or the ring volume when you are not engaged in a call.
- To increase/decrease the volume, press +/-

8. CONNECTED TO COMPUTER OR PDA

The headset also can connect to PC or PDA, please refer to the instruction of computer or PDA which support Bluetooth function device.
