Ref: FCC ID: SRQ-BLADEA452

Dear Sirs:

ZTE CORPORATION requests acceptance of the labeling proposal described below for mobile phone bearing FCC identifier SRQ-BLADEA452.

The subject cell phone are compact handheld models as shown in figure 1, authorized under 47CFR Part 22 &24&27 for smart mobile services.

Figure 1.

Because the majority of the cell phone housing is composed of display, speaker, operating controls and battery pack, there is extremely limited space available to attach the required label carrying the FCC identifier. But the battery as a permanent part and cannot move out from the phone (the battery will be fixed inside the phone by the glue and the screw, user cannot remove it), attaching the label to the battery pack back side is acceptable because the battery pack is a non-removable item. For this reason, ZTE CORPORATION proposes placing the label carrying the FCC identifier on the battery compartment as shown in figure 2.

Figure 2.

The consumer packaging for these models includes the battery pack as one item. As such, the FCC identifier will be readily visible to the user before the back housing is installed

In this location, the label will also be protected from physical abuse and remain readable for the anticipated life of the device.

The consumer packaging for these models is a "gift box" which does not allow the transceiver to be seen at time of purchase. In order to meet the requirements of 47CFR Part 2.925 (d), ZTE CORPORATION will add the FCC identifier "SRQ-BLADEA452" to the outside of the consumer "gift box" packaging.

Thank you for your attention to this matter.
