RE: Applicant: ZTE Corporation, FCC ID: SRQ-BLADEA570, Request for supercede of WIFI test report exhibit

The original WIFI report, and report No.: SET2015-15145 page 51~53 shows 802.11n40 spurious emission, but the EUT not support 802.11n40 mode, this is a mistake. So our customer request to revise/supercede the report and the grant. The new version WIFI report only delete page 51~53 spurious emission data and no influence on the test results.

Therefore, we are asking to kindly replace the WIFI report with revised copies.

You can find the changes on page 51~53 of the revised test report,

Thank you,
