RF Exposure Information

Radio Frequency (RF) Exposure

Your device contains a transmitter and a receiver. When it is ON, it receives and transmits RF energy. When you communicate with your device, the system handling your connection controls the power level at which your device transmits.

Important safety information regarding radio frequency radiation (RF) exposure. To ensure compliance with RF exposure guidelines the device must be used with a separation from the body.

Failure to observe these instructions could result in your RF exposure exceeding the relevant guideline limits. The device was tested according to FCC RF exposure procedures to address hand and near-body exposure conditions, and the highest SAR value as reported to the FCC is 1.43 W/kg.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirements.

The FCC grant can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: SRQ-Z917
