ANR8581 Test HoundBytes Test  
Report SWG-PP55 R. Setup Photos.p...

Attached is the test setup photo exhibit and a revised test report. We confirm that an EMC active loop antenna was used for measurements below 30MHz and the equipment list includes the antenna information.

Thanks-

Brian

Regarding www.AmericanTCB.com application:

ATCB ID: ATCB002095

FCC ID: SWG-PP55

IC ID:

NB ID:

Account name: kalanfcc

Andrew,

Attached please find comments on this filing. There are several required documents that are missing, and one correction that must be made to the Test Report. Once these are received and reviewed, we should be able to issue the Grant.

Best Regards,

Bill
