MODULAR TRANSMITTER APPROVAL

TO WHOM IT MAY CONCERN

We, **DUALi Inc.**, hereby requests for part 15 unlicensed limited modular transmitter approval of our **DE-ABCM-DC** module, described as follows:

Model name: **DE-ABCM-DC**

FCC ID: **SWUDEABCMDC**

**1. The modular transmitter must have its own shielding.**

The product is a complete RF transmitter. The product does have its own shielding.

**2. The modular transmitter must have buffered modulation/data inputs**

The module has a memory management unit inside of the main IC. It buffers the data inputs from USB interface.

**3. The modular transmitter must have its own power supply regulation**

The EUT contains USB interface (DC 5 V input). The internal voltage will be supplied by USB interface.

**4. The modular transmitter must comply with the antenna requirements of Section 15.203 and 15.204**

The transmitter shall only be used with the tested antenna that is integral PCB antenna.

**5. The modular transmitter must be tested in a stand-alone configuration**

The EUT was tested in a stand-alone configuration. The module was connected with the notebook PC via USB interface, during the test. See also the test report and Test setup photos.

**6. The modular transmitter must be labeled with its own FCC ID number**

The EUT will be labeled with its own FCC ID number. The label is specified in Label Information document. If the module is installed inside of an end-product, the label will not be visible. In this case the OEM customer will be instructed to how to apply the exterior label.

**7. Data input/output lines must not contain ferrites, unless they will be marketed with the module.**

The EUT contains ferrites on the USB cable, however the USB cable will be marketed with the module.

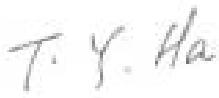

**8. The modular transmitter must comply with any specific rule or operating requirements**

The EUT is compliant with all applicable FCC rules. Detail instructions are given in the product Instruction Manual.

**9. The modular transmitter must comply with any applicable RF exposure requirements.**

The EUT is a 13.56 MHz RFID device, and radiates extremely low RF power level. It is categorically excluded from RF exposure requirements.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Y. Ha".
