Cover letter- Class II Permissive change for **FCC ID: T8GIDC23H**

Changes to T8GIDC23H include passive component value changes to improve the manufacturing process, component substitution to reduce cost, and enclosure changes to reduce cost. Minor PCB layout changes accompany a few of the component substitutions. Moreover, these hardware changes do not affect SAR and/or RF field strength limits previously calculated.

The output power characteristics of the final product are unchanged.

Sincerely,
