Subject: Request for Confidentiality

To Whom It May Concern:

We, Ericsson CBC, hereby request that the Exhibits/Items listed below be withheld from public inspection in accordance with Sections 0.457 and 0.459 of the Commission's Rules. This due to the following reasons:

WCDMA Remote Radio Unit (RRU) is designed strictly based on the technical specifications of the international project 3GPP (the 3rdGeneration Partnership Project). The competition in this field is very intense and a less advanced solution/design could get an unfair advantage by accessing the information as listed below from common domain. As we believe that we have implemented groundbreaking solutions and designs into our recent Remote Radio Unit (RRU) compared to the previous RRU, the listed Exhibits/Items need to be protected from disclosure to our competitors in the industry. As the FCC records have in-depth information and a very wide distribution, we believe that you can understand our concerns. We are strong in our belief that all vendors in the industry need to compete by their own merits. We regard these Exhibits/Items to be our intellectual property and therefore as confidential information.

As outer RRU is generally installed in restricted places, public access is not possible although some types of our RRU under certain circumstances can be installed in an unrestricted place, but the RRU is a single unit with an enclosure which can not be opened. Therefore, individual modules within our RRU should not be revealed to the public.

There are advanced technical and design solutions/information in the Exhibits/Items, as mentioned above, that we regard as Ericsson proprietary, with actual and potential patents pending. The information can be advantageous to our competitors as well as sources seeking ways to hack past the built in security functionality. These solutions or information thereof are not accessible even for our customers or partners unless non-disclosure agreements for particular item(s) have been signed. Confidential product information can be found in, but not necessarily limited to, internal photos of the RRU, block diagrams, schematic diagrams, and parts lists as well as certain documents, such as the user's manuals. Those documents can only be accessible by the customers who purchase our RRU and accept the conditions and therefore are provided with unique information access tools.

<b>EXHIBIT 9</b>	Internal Photos
<b>EXHIBIT 4</b>	Block Diagram
<b>EXHIBIT 5</b>	Schematics Diagrams
<b>EXHIBIT 8</b>	Manuals & Requirement Specifications
<b>EXHIBIT 10</b>	Parts List
<b>EXHIBIT 12</b>	Technical Circuit Description

If additional information is needed, please contact me on the below listed number.
