

Hello Tim,

Please find our replies below,

1. The connector is R-SMA.
2. The device is certified the Part 15C for the Tx by this filing, and the Part 15B is DoC tested and reported separately by our Taipei facilities which is accredited test lab.
- 3~4. Please refer to the supplementary photo uploaded by this time.
5. Please refer to the revised MPE uploaded by this time
- 6~8. Please refer to the revised user manual (named: (WN550G)UserMan_0805_most updated) uploaded by this time
9. Please refer to the revised MPE uploaded by this time
- 10~14. Please refer to the revised test report (named: SZ050624B04-RP_0805_most updated) uploaded by this time
15. The EUT is not user-servicable for the adjusting the channel in use, all the setting is defined and set into the firmware by the manufacturer before it's placing into the market.
- 16~17. Please refer to the revised test report (named: SZ050624B04-RP_0805_most updated) uploaded by this time

Thank you!!

Eric 0806
