Package Includes:

- Wireless Optical Mouse
- USB Receiver

System Requirements

- Windows® 98, 2000, Me or XP
- USB port
- PC 486 or higher

Rf Device Use Is Prohibited On Aircraft

Wireless Optical Mouse Operation Instructions:

1. Insert two 2 AA batteries in compartment on bottom of mouse. Make sure positive and negative ends on batteries match connectors.
2. Insert USB plug on receiving device into USB port on computer. Red light on receiver will light up when installed correctly.
3. Press button on receiver and red light will blink on and off for a few seconds. Immediately turn mouse over, hold near receiver, press connect button on the bottom of the mouse, release it while light is blinking on receiver. Devices will search for and find each other.
4. Turn mouse right side up and place on solid tabletop or mouse pad and mouse will work correctly.
5. When mouse is idle for more than 8 minutes, it will go into "rest" mode. Wake the mouse by pressing either the right or left hand button.

For best operation, keep mouse within 4 feet of receiver inserted into USB port on computer. Certain objects such as electronic fans, fluorescent lamps, large metal objects, and radios, can cause interference in connection between mouse and receiver. For best results keep items 12 inches from the receiver.
