Attention：The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types M-1 (FCC ID: TTP05M-1) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.132 W/kg and when properly worn on the body is 0.058 W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Warning：Improper use will cause invalidation of the warranty

■ USE AND MAINTENANCE

This mobile is designed by excellent technique, please use carefully.

The following suggestion will help you use and maintain the mobile better.

1. Keep the phone and all parts in a safe place out of the reach of young children.

2. Please keep dry. Rainwater, humidity and any kinds of liquid or moisture might contain mineral which could corrode the circuit.

3. Kinetic parts maybe damaged if you put or use the

phone in a dirty place.

4. Please do not put the mobile in a high-temperature place. High-temperature might shorten the life of electron sets, destroy the battery and distort or melt some plastic part.

5. Please do not keep the mobile in a low-temperature place. When move it from low-temperature to high-temperature, interior may engender humidity, and this might cause damage to the PCB.

6. Please don't trying to dismantle the mobile. The wrong disposal performed by non-professionals may destroy the setting.

7. Please don't throw, thump or shake the mobile. Rough usage of the mobile will damage the internal main board.

8. Please don't use pungency chemicals, detergent or caustic detergents to clean the mobile. If you want to clean it, please wipe it slightly with rag with some suave soap water.

9. Please don't paint on the phone. Color might hinder

the kinetic and affect normal manipulate.

10. Use the substituted antenna we provide, or other eligible antenna. Usage of disapproved antenna or other parts might damage the mobile.

11. If the mobile was wetted, please switch it off and remove the battery. Make sure the mobile has dried for 24 hours before using it again.

12. When you use the mobile, please turn down the volume, the backlight ; and reduce the displaying time of the keypad's backlight. All the above operation will help you to elongate the standby time.

13. Keep metal (except the charger port and data cable port originally provided) away from the charger port of the mobile to avoid short circuit.
