Re.: Output Power  
Equipment: FCC: TV7RB911-5HNDM

To Whom It May Concern:

MIKROTIK addresses the following items to ensure that the above referenced equipment is reducing output power properly:

1. Device's output power is adjusted based on "antenna gain" setting encoded into device's memory. When it is 0dBi transmitter works at its maximum, when it is anything above 0dBi transmitter "decreases" output power if necessary to meet the EIRP limit set by FCC Part 15.407

Sincerely,

A handwritten signature in blue ink, appearing to read "Edmunds Zvegincevs".
