Mr. Zvi Huber  
General Manager  
Stellar Satellite Communications  
21700 Atlantic Boulevard  
Dulles, Virginia 20166

Dear Mr. Huber:

The Federal Communications Commission has issued a blanket license to ORBCOMM to operate mobile Earth terminals with its Non-Voice, Non-Geostationary mobile satellite system, 10 FCC Rcd 6572 (1995). Under that license and the Commission's Rules (47 CFR §§ 25.115(d) and 25.135), ORBCOMM has been delegated responsibility to ensure that terminals operating within the ORBCOMM System comply with the terms of such satellite license and Parts 2 and 25 of the Commission's Rules. Pursuant to that responsibility, ORBCOMM has analyzed Stellar DS100 Subscriber communicator for original equipment manufacturer (OEM) applications. ORBCOMM is pleased to certify that this product conforms to the FCC requirements listed above along with those requirements put forth by ORBCOMM, less the waivers listed on the enclosed document.

The completion of this product is another important milestone in the deployment of ORBCOMM around the world. I am sure that the Stellar DS100 will be received with much enthusiasm.

I look forward to seeing additional [manufacturer] products being introduced into the market and want to thank you and your team for its work thus far.

Regards,

A handwritten signature in blue ink that reads "D. Dean Brickerd, Jr." The signature is fluid and cursive, with "D. Dean" on the top line and "Brickerd, Jr." on the bottom line.

D. Dean Brickerd, Jr.  
Vice President, Technical Services
