

RE: ATCB014863 – Original Equipment & Single Certification Applications – Model: 41920

FCC ID: TYD-CS41920 & IC: 8471A-CS41920 for LogicMark, LLC

I have a few comments on this Application. Please [do not put confidential information](#) in your responses to these questions because the response letter will not be held confidential by the FCC. Depending on your answers there may be more questions.

2. I've had a long discussion with the CB on this application regarding the label on the battery cover. His perspective is the battery cover is not permanent so the label as submitted is not acceptable. For the label to be acceptable, you must demonstrate that the battery cover has a metal hinge or is a permanent part of the device enclosure. From the pictures provided, this is not the case. You probably should move the ID label into the battery compartment. Please address.

**Response: The product will have an additional label inside the battery compartment. The additional label is submitted as an exhibit.**
