	When another cellphone is paired with your cellphone

When searching for a Bluetooth® wireless connection (neither connected nor paired), the following icons may appear:

	When your cellphone is searching for an audio device
	When your cellphone is searching for a PC
	When your cellphone is searching for a PDA
	When your cellphone is searching for another cellphone

When successfully connected, the following icons may appear:

When a headset is connected with your cellphone

Feature Overview

Water Resistance

The G'zOne ROCK™ is water resistant. It provides reliable performance for outdoor life, in such conditions as driving rain or high humidity.

The tested device meets the requirements of MIL-STD-810 (Rain & immersion 1m, 30min) standard.

NOTE

To maintain water resistance:

- Securely fasten the Charging/Data Port cover and the Headset Jack cover.
- Completely close the battery cover and rotate the battery lock to the LOCK position.

Shock Resistance

The rugged construction of the G'zOne ROCK™ provides outstanding shock and vibration resistance. The tested device meets the requirements of MIL-STD-810 (Drop 1.5m) standard.

Warning!

The shock and vibration resistance features do not guarantee protection against every type of shock and vibration. Your cellphone may be damaged and malfunction depending on the severity of received shock or vibration.

Dust Resistance

For additional peace of mind, the G'zOne ROCK™ is also dust resistant. The device was tested using silica flour at a temperature of 95F and meets the MIL-STD-810 (Dust) standard.

NOTES

- Your cellphone can be rinsed with clean water when dirty. To ensure water resistance, make sure that all covers are securely closed before rinsing.
- Periodically, clean the Charging Terminals with a dry cloth or cotton swab. Dust may cause some electrical connection problems. Avoid wiping with excessive force, which can disfigure the terminals.

Charging Terminals (external)

Battery
Charging Terminals

Device Lock Tool

The screw type battery cover lock can be locked or unlocked by inserting the tip of the corner of the Device Lock Tool into its groove and rotating to FREE position or LOCK position. For how to close or open the battery cover, see page XX.

Device Lock Tool

Illustration

The Battery

The cellphone comes with a rechargeable battery. Keep the battery charged while not in use in order to maximize usage and standby time.

Warning!

- Use only approved batteries for the G'zOne ROCK™. Wipe your cellphone before opening the battery cover to prevent moisture or dust from entering.
- Failure to follow the below directions for installing/removing the battery could result in product failure.
- Fully charge the battery before using the cellphone for the first time.

Installing the Battery

Warning!

Do not install the battery where water or liquid may fall directly on the cellphone or battery or in a humid place such as a bathroom. Otherwise, the electrical circuits may short or erode and cause the cellphone to malfunction.

1. Insert the tip of the corner of the Device Lock Tool into the groove of the screw type battery cover lock and rotate in the direction indicated by the arrow in the figure to the right. Rotate the battery lock as far as it will go towards the FREE position.

2. Insert your finger in the groove (① in the figure to the right) on the left side of the cellphone and pull up the battery cover in the direction of the arrow ② in the figure to the right.

3. Insert the two tabs on the left side of the battery into the cellphone (in the direction of the arrow ① in the figure to the right) and insert the battery into the cellphone (in the direction of the arrow ② in the figure to the right).

4. Insert the three tabs at the bottom of the battery cover into the cellphone (in the direction of the arrow ① in the figure to the right) and insert the battery cover into the cellphone (in the direction of the arrow ② in the figure to the right).

5. Press four locations on both sides of the battery cover in the direction of the arrow in the figure to the right.

6. Slide your finger over both sides of the battery cover in the direction of the arrow and check that the battery cover is firmly in place.
