

14 April 2007

To whom it may concern,

Label Location Justification

FCC ID: UANHIPI2300

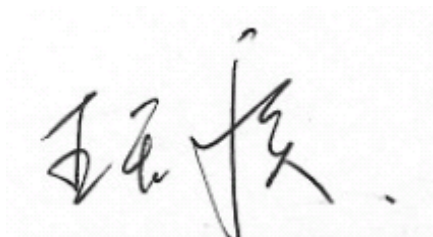

Request is hereby submitted by **PARAGON WIRELESS INC.** to request an alternative method of positively identifying the equipment, pursuant to 47 CFR § 2.925(f) of the FCC Rules.

The FCC Identifier is not desirable to be shown on the outside of the equipment enclosure because the available label area on the phone is limited. It is relatively small and has many contoured surfaces, keypad, LCD display, charge contacts. The FCC Identifier will be permanently affixed to the battery compartment instead of the enclosure outside as shown in attachment of the label location photos. The battery is designed for easy removal. The battery cover and battery are packed separately. It can be readily visible by purchaser as well as be easy visible at all times during battery installation that can fulfill 47 CFR § 2.925(d) of the FCC Rules.

The user manual has already included the FGG statements, pursuant to 41 CFR § 15.19(a)(3), 15.21 and 15.1 D5(b).

If you have questions or need further information, please contact the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read 'Wang Wuji', is written on a light-colored background.

Wang Wuji
Manager
