

Conducted emissions test setup

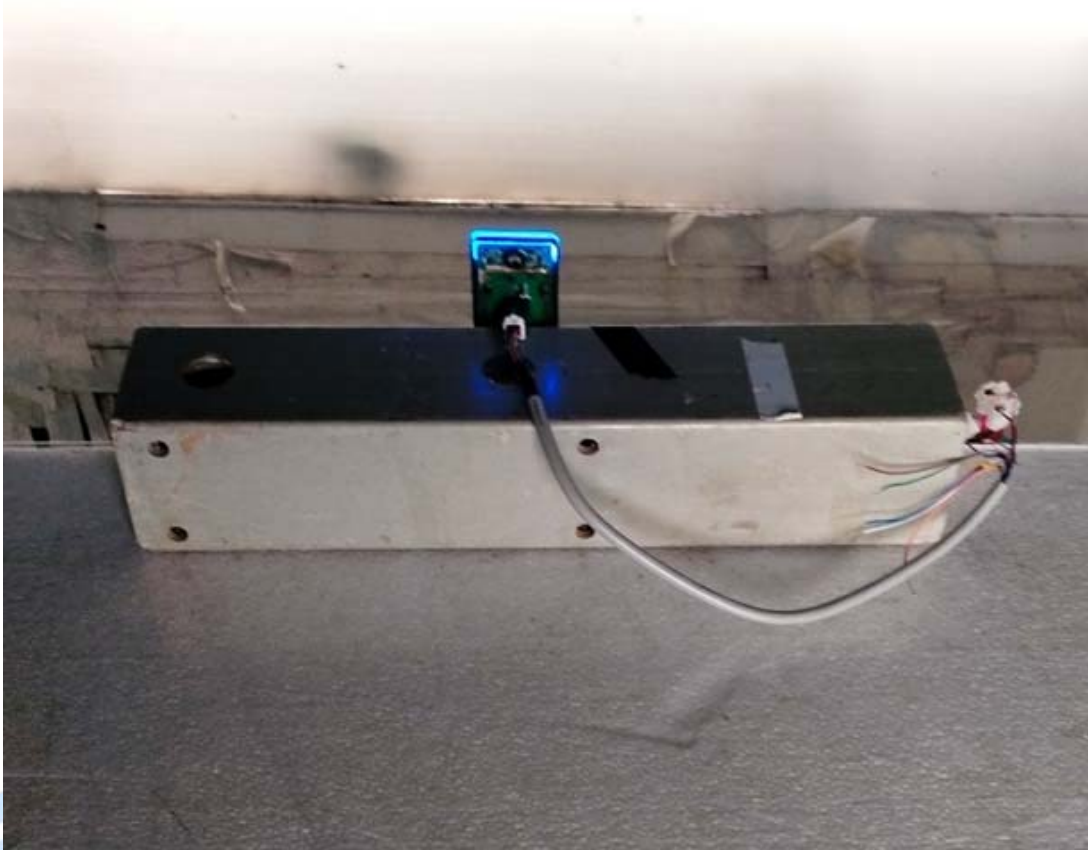

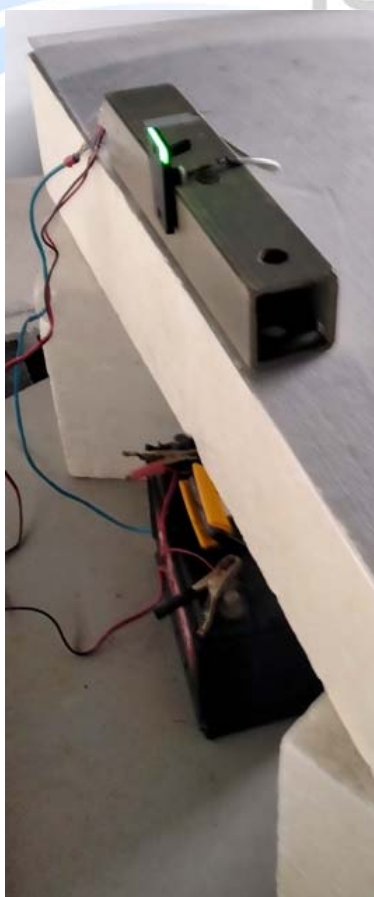

Technologies

Global Product Certification

Radiated emissions test setup

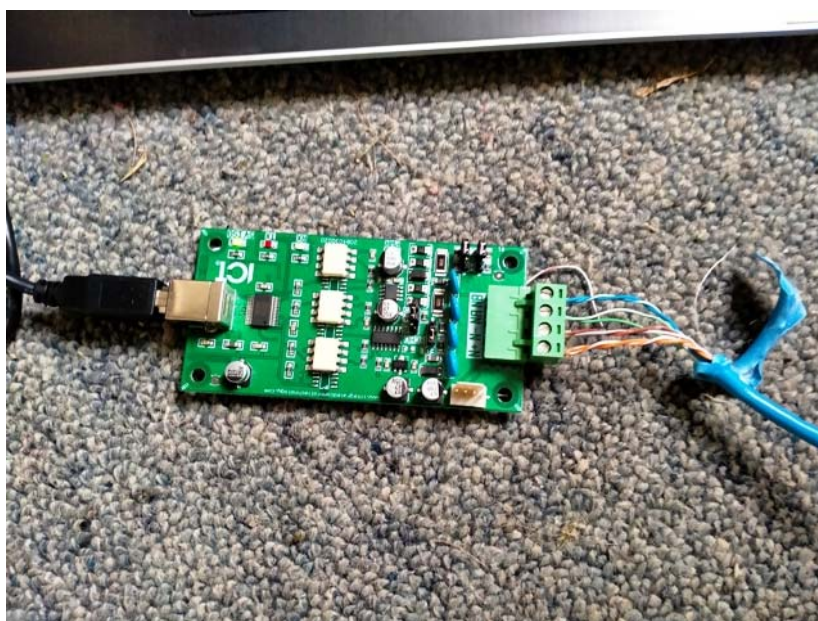

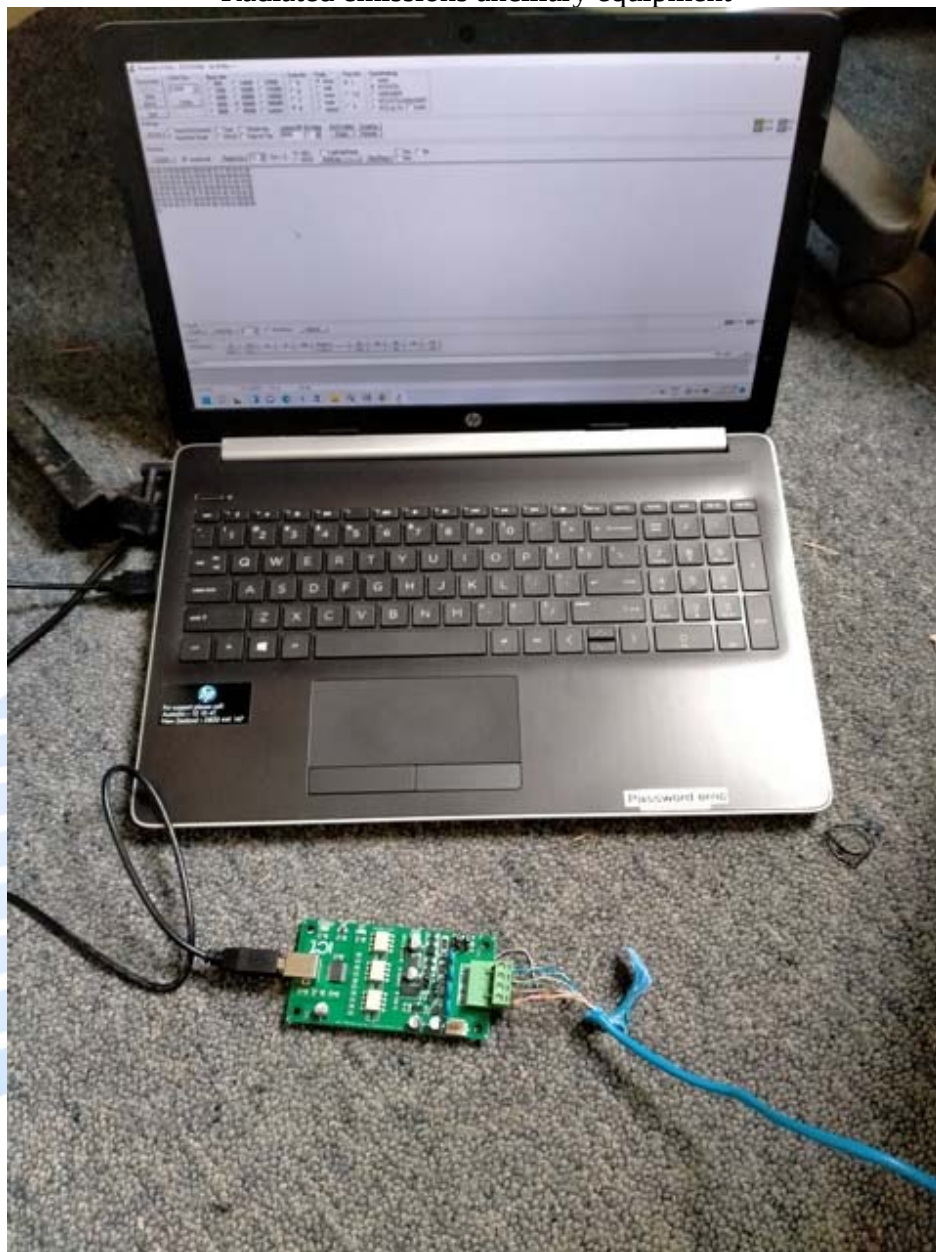

Test set up below 1000 MHz. Product on test table on top of turntable at a height of 80 cm

Test set up above 1000 MHz. Additional block makes the table 1.5 metres.

Radiated emissions ancillary equipment

Schwarzbeck Biconnical Antenna (30 – 300 MHz)

Schwarzbeck log periodic antenna (300 – 1000 MHz)

EMCO 3115 Horn Antenna (1 – 18 GHz)

Test shed showing a loop antenna in use.
