## Model HL-355V<sub>kx</sub>

*300W VHF Power Amplifier for Amateur Radio Manufactured and Prepared  
by Tokyo Hy-Power Labs., Inc., Japan*

### *Tuning Procedure*

We confirm that there are no tuning knobs on the front or back. This is a solid state amplifier, drive it with 35-40W (on 144-148MHz) power and it puts out 300W nominal (320W max.). No tuning is possible or required.
