Using This Guide

Before reading this guide, make a note of the following:

● In this guide, SoftBank 942P User Guide, SoftBank 942P is abbreviated as 942P.
● "microSD Card" and "microSDHC Card" are referred to as "microSD Card" in this guide.
● Handset operations and screenshots are based on defaults for handset color **White** (☞P.18-28).
● Handset operations and screenshots are based on Normal Position.
● Sample screenshots, etc. are provided for reference only. Actual handset windows, menus, etc. may differ in appearance.
● Key icons use simplified labels.
● Most operation descriptions begin in Standby.
● Pressing a key for more than one second is described as "Press and hold."

Handset, Battery, USIM Card, Desktop Holder, AC Charger (sold separately) & microSD Card (not included)

⚠ Danger

🚫 **Do not use or leave handset, battery, Charger or Desktop Holder in locations subject to high temperature, such as near an open flame/heater, in sunlight or inside a car on an extremely hot day.**
Battery may leak, overheat, explode, catch fire. Handset or related hardware may deform or malfunction. Part of the casing may also become hot and cause burns.

🚫 **Do not use excessive force to attach battery or connect Charger or Desktop Holder to handset. Battery or connector may be the wrong way around.**
Battery may leak, overheat, explode or catch fire.

🔧 **Do not disassemble, modify or solder handset or related hardware.**
May cause accidents such as fire, bodily injury, electric shock or equipment malfunction. Battery may leak, overheat, explode or catch fire. Modifying handset is a violation of Radio Law and subject to prosecution.

🚱 **Do not get handset, battery, Charger or Desktop Holder wet.**
If handset, battery, Charger or Desktop Holder is left wet or battery is charged after exposure to liquids such as water or pet urine, overheating, electric shock, fire, injury or malfunction may occur.
Be mindful of location when using handset, battery, Charger or Desktop Holder.
Handle with care.

Use specified battery, Charger (sold separately) and Desktop Holder.
Battery may leak, overheat, explode or catch fire, and Charger may overheat, catch fire or cause malfunction.

⚠ Warning

Do not place handset, battery, Charger or Desktop Holder inside cooking appliances, such as microwave ovens or high-pressure containers, or on IH cooking heaters.
Battery may leak, overheat, explode or catch fire. Handset, Charger or Desktop Holder may overheat, emit smoke, catch fire or cause malfunction.

Do not drop, throw or otherwise subject to strong force or impacts.
Battery may leak, overheat, explode, catch fire, or cause electric shock or damage to handset.

Do not allow liquids (water, pet urine, etc.) or conductive objects (pencil lead, metal pieces, necklaces, hair pins, etc.) to contact Charger terminals, external port terminals or microSD Card slot.
May cause fire or malfunction triggered by short-circuit.

Do not charge battery while handset is wet.
May cause electric shock or short circuit, resulting in fire, malfunction, etc.

Keep handset off and Charger disconnected near propane gas, in filling stations or places where flammable gas is generated.
Handset use in such areas may lead to fire. Be sure to turn off handset before using Osaifu-Keitai® in filling stations. (When IC Card Lock is set, turn off handset after unlocking setting.)

If handset, battery, Charger or Desktop Holder emits an unusual sound, smoke or odor, perform following steps:
1. Unplug Charger from outlet.
2. Turn off handset.
3. Remove battery. (Take care to avoid burns or injuries.)
May cause fire or electric shock.

⚠ Caution

Do not place handset, battery, Charger or Desktop Holder on an unstable surface.
May fall, causing injury or malfunction. Take extra precautions while vibration alert is active or during charging.

Keep handset and related hardware out of the reach of young children.
May result in accidental ingestion or bodily injury.

If for use by child, guardian should teach proper handling and ensure handset and related hardware is used as directed.
May result in bodily injury.

Battery

⚠ Danger

See battery label to confirm battery type.

Label	Battery Type
Li-ion 00	Lithium-ion

🚫 **Do not throw battery into fire.**
Battery may leak, explode or catch fire.

🚫 **Do not pierce battery with a nail or other sharp object, hit it with a hammer, step on it, or subject it to strong shocks.**
Battery may leak, overheat, explode or catch fire.

🚫 **Do not touch terminals with metallic objects or carry/store battery with conductive objects (pencil lead, metal pieces, necklaces, hair pins, etc.).**
Battery may leak, overheat, explode or catch fire.

❗ **If battery fluid gets into eyes, do not rub; flush with clean water and see a doctor immediately.**
Failure to do so may cause blindness.

⚠ Warning

❗ **If battery fluid comes into contact with your skin or clothing, stop handset use immediately and rinse fluid off with clean water.**
Battery fluid is harmful to your skin.

❗ **If battery does not charge after specified time, stop charging.**
Battery may leak, overheat, explode or catch fire.

❗ **If battery emits an unusual odor, overheats, discolors or deforms, immediately remove battery and move it away as far as possible from any flame or fire. Take care to avoid burns or injuries.**
Battery may leak, overheat, explode or catch fire.

⚠ Caution

🚫 **Do not dispose of battery with ordinary refuse.**
Place tape over the terminals to insulate battery, and take it to a SoftBank retailer or institution that handles used batteries in your area. Comply with local waste disposal regulations for recycling.

Handset

⚠ Warning

🚫 **Do not use handset while driving a vehicle.**
Doing so may interfere with safe driving and cause an accident. Stop your vehicle to park in a safe place before using handset. Drivers using handsets while driving are subject to prosecution.

🚫 **Do not aim the infrared port at eyes when using infrared communication.**
Doing so may affect eyes.

🚫 **Do not point Photo light directly at someone's eyes. Do not look directly at Photo light while light is on.**
May damage eyesight or cause accidents due to momentary sight loss or surprise. Do not take pictures of infants at close range.

Turn off handset near high-precision electronic devices or devices using weak electronic signals.
Handset may cause these devices to malfunction.
*Electronic devices that may be affected: Hearing aids, implantable cardiac pacemakers, implantable cardioverter defibrillators, other medical electronic devices, fire alarms, automatic doors and other automatically controlled devices.

Turn off handset aboard aircraft.
Handset signal may interfere with aircraft operation.
When in-flight handset use is permitted, follow airline instructions for proper use.

If you have a weak heart, take extra precautions when setting functions such as Vibration or Ringer Volume for incoming transmissions.
May affect heart.

In a thunderstorm, immediately turn off handset and seek shelter.
There is a risk of being struck by lightning and suffering electric shock.

⚠ Caution

If handset affects car electronics, stop use.
Handset use may affect electronics in some models. In this case, stop use; could impede safe driving.

Do not place a magnetic card near or in handset.
The stored magnetic data in cash cards, credit cards, telephone cards and floppy disks, etc. may be erased.

Do not swing handset by its strap, etc.
Handset may strike you or others, or strap may be broken resulting in injury or damage to handset or other property.

Do not place your ear too close to the speaker while ringer sounds or sound files play.
May impair hearing.

If skin abnormality occurs, immediately stop use and seek medical treatment.
Handset contains metals. Handset use may cause itching, rashes, eczema or other symptoms depending on the user's physical condition.

Handset may become hot while used in a hot environment.
Avoid prolonged skin contact that may result in burns.

Make sure not to trap fingers or objects when opening/closing handset.
May result in injury or damage to display.

Watch TV with adequate lighting and distance from Display.
May damage eyesight.

Do not turn up the volume unnecessarily high when using earphones.
Using earphones with volume turned up for an extended period may impair hearing or injure ears.

Desktop Holder & AC Charger (sold separately)

⚠ **Warning**

Do not cover or wrap Charger or Desktop Holder during charging.
May cause overheating, fire or malfunction.

Always use the specified power supply/voltage.
Using incorrect voltage may cause fire or malfunction.
AC Charger: AC100V-240V (household AC outlet only)
In-Car Charger: DC12V, 24V (vehicles with a negative earth only)

Use In-Car Charger in vehicles with a negative (-) earth. Do not use In-Car Charger if vehicle has a positive (+) earth.
May cause fire.

Do not use Charger in thunderstorms.
There is a risk of suffering electric shock.

Do not expose Charger or Desktop Holder to liquids and high humidity (e.g., precipitation, bath/shower room, restroom, etc.).
May cause fire, electric shock or malfunction.

Do not handle Charger with wet hands.
May cause electric shock or malfunction.

If In-Car Charger fuse blows, always replace it with specified fuse.
Using the incorrect fuse may cause fire or malfunction. Refer to the respective manuals for information on the correct fuse specifications.

If dust accumulates on plug, unplug Charger and wipe with a dry cloth.
May cause fire.

When plugging Charger into outlet, keep conductive materials (pencil lead, metal parts, necklaces, hair pins, etc.) away from Desktop Holder terminals or Charger plug/terminals and plug Charger firmly into outlet.
May cause electric shock, short-circuit or fire.

Unplug Charger during periods of disuse.
May cause electric shock, fire or malfunction.

If liquid such as water or pet urine get into Charger, unplug it immediately.
May cause electric shock, smoke emission or fire.

⚠ Caution

Pull Charger (not cord) to unplug Charger.
Pulling on the cord may damage the cord and cause electric shock or fire.

Always unplug Charger before cleaning it.
May result in electric shock.

Near Electronic Medical Equipment

⚠ Warning

This section is based on "Guidelines on the Use of Radio Communications Equipment such as Cellular Telephones and Safeguards for Electronic Medical Equipment" (Electromagnetic Compatibility Conference, April 1997) and "Report of Investigation of the Effects of Radio Waves on Medical Equipment, etc." (Association of Radio Industries and Businesses, March 2001).

If you use an implantable cardiac pacemaker or cardioverter defibrillator, keep handset more than 22 cm away from the implant at all times.
Handset radio waves may affect implantable cardiac pacemaker or cardioverter defibrillator operations.

Persons using electronic medical equipment outside medical facilities should consult the vendor about possible radio wave effects.
Handset radio waves may affect electronic medical equipment operations.

Observe the following in medical facilities. Handset radio waves may affect electronic medical equipment.
• Do not take handset into operating rooms, Intensive Care Units or Coronary Care Units.
• Turn off handset inside hospital wards.
• Turn off handset even outside hospital wards (in hospital lobbies, etc.); electronic medical equipment may be in use nearby.
• Where a medical facility has specific instructions prohibiting the carrying and use of mobile phones, observe those instructions strictly..

Turn off handset in crowded places such as rush hour trains; implantable cardiac pacemakers or cardioverter defibrillators may be in use nearby.
Handset radio waves may affect implantable cardiac pacemaker or cardioverter defibrillator operations.

Handling Precautions

General Notes

● **SoftBank is not liable for damages from accidental loss/alteration/repair of handset/microSD Card information (Phone Book entries, image/sound files, etc.). Back-up important information.**
● **Handset transmissions may be disrupted inside buildings, tunnels or underground, or when moving into/out of such places.**
● **Use handset without disturbing others.**
● **Handsets are radios as stipulated by the Radio Law. Under the Radio Law, handsets must be submitted for inspection upon request.**
● **Handset use near landlines, TVs or radios may cause interference.**
● **Read microSD Card manual beforehand for proper use.**
● **Beware of eavesdropping.**
Digital signals reduce interception, however transmissions may be overheard. Deliberate/accidental interception of communications constitutes eavesdropping.
"eavesdropping" means radio communication is received by another receiver deliberately or accidentally.
● **Be cautious of unsafe websites. Take extra precautions especially when posting personal information on websites.**

Electromagnetic Waves

● **For body worn operation, this mobile phone has been tested and meets RF exposure guidelines when used with an accessory containing no metal and positioning the handset a minimum 15 mm from the body. Use of other accessories may not ensure compliance with RF exposure guidelines.**

FCC Notice

● **This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:**
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.
● **Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.**

FCC RF Exposure Information

Your handset is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.
The guidelines are based on standards that were developed by independent scientific organization through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.
The exposure standard for wireless handsets employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. The tests are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC for each model.
The highest SAR value for this model handset as reported to the FCC when tested for use at the ear is 0.582 W/kg, and when worn on the body in a holder or carry case, is 0.286 W/kg.
Body-worn Operation; This device was tested for typical body-worn operations with the back of the handset kept 1.5 cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5 cm separation distance between the user's body and the back of the handset. The use of beltclips, holsters and similar accessories should not contain metallic components in its assembly.
The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. The FCC has granted an Equipment Authorization for this model handset with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model handset is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/ea/ after searching on FCC ID UCE210030A.
Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) website at http://www.phonefacts.net.

European RF Exposure Information

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg and the highest SAR value for this device when tested at the ear was 0.327 W/kg*. As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this user guide**. In this case, the highest tested SAR value is 0.287 W/kg. As SAR is measured utilizing the devices highest transmitting power the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure then you can do so by limiting the length of calls or using a hands-free device to keep the mobile phone away from the head and body.

*The tests are carried out in accordance with international guidelines for testing.
** Please see Electromagnetic Waves on page xix for important notes regarding body worn operation.

Declaration of Conformity

$C\epsilon0168$

We, Panasonic Mobile Communications Development of Europe Ltd., declare that SoftBank 942P conforms with the essential and other relevant requirements of the directive 1999/5/EC. A declaration of conformity to this effect can be found at

- **http://panasonic.net/pmc/support/index.html**
- **This product is only intended for sale in Japan.**
- **Compliance to the European RTTE directive applies to: SoftBank 942P handset, battery (PMBAY1) and AC Charger (SoftBank ZTDAA1, marked MITSUMI).**

Handset Care

- **942P is not completely waterproof. Be sure to observe the following:**
  - Use handset with External Port Cap, Inner Cover and Battery Cover tightly closed. Failing to do so may result in malfunction.
  - Malfunction caused by contact with liquids may not be covered by Warranty.
  - Do not install/remove battery or open/close External Port Cap or Battery Cover in rain or when handset is still wet.
  - Accessories and other optional items are not waterproof.
  - Air conditioned air may cause condensation, resulting in corrosion.

- **If handset is left with no battery or an exhausted one, data may be altered/lost. SoftBank is not liable for any resulting damages.**
- **Use handset within temperatures of 5°C to 35°C and humidity 35% to 90% (limiting to temporary use in a bathroom within 36°C to 40°C). Avoid extreme temperatures/direct sunlight.**

- Handset may become warm during use or charging. This is not malfunction.
- Battery may swell as service life nears end; this is not a problem.
- Exposing lens to direct sunlight may damage color filter and affect image color.
- Soiled terminals may cause poor connection. If the terminals are dirty, use a dry cloth or cotton swab to wipe them clean.
- Clean handset with dry, soft cloth. Using alcohol, thinner, etc. may damage it.
- Avoid forceful rubbing or scratching handset displays.
- Do not subject handset to excessive force.
  - Do not sit down with handset in a back pocket.
  - Do not place heavy objects on a bag with handset inside.
- Do not remove nameplate from handset; doing so invalidates warranty.
- Always turn off handset before removing battery. If battery is removed while saving or sending mail, data may be altered or lost.
- LCD is manufactured with high precision technology, however, some pixels may appear darker/brighter.
- Connect only specified products to External Port.
- While walking, moderate earphone volume to make sounds around you audible and help avoid accidents.
- When holding handset in use, do not cover Speaker.

Function Usage Limits

These functions are disabled after handset replacement/upgrade or service cancellation: Camera; Digital TV; Music Player; S! Appli; Lifestyle-Appli; Wi-Fi.
After a period of disuse, these functions may become unusable.

Multitasking During Calls/Data Transmissions

- Transmission fees apply while other functions are used during a call/data transmission.

Mobile Camera

- Be sure to observe proper etiquette when using the camera.
- Do not expose the camera lens to direct sunlight. Concentrated sunlight through the lens may cause the handset to malfunction.
- Be sure to try taking and previewing pictures before using the camera on important occasions like wedding ceremonies.
- Do not commercially use or transfer pictures taken with the camera without the permission of the copyright holder (photographer), except for personal use.
- Do not use the camera in locations where taking photos and recording videos are prohibited.

Bluetooth®/Wi-Fi

- **Bluetooth®/Wi-Fi connection is not guaranteed with all Bluetooth®/Wi-Fi devices.**
- **Handset complies with Bluetooth®/Wi-Fi security standards. However, this does not ensure 100% security.**
- **SoftBank is not liable for damages arising from accidental data/information leakage during Bluetooth®/Wi-Fi transmissions.**
- **Wi-Fi function is only intended for use in Japan. This handset's Wi-Fi function is certified as compliant with the radio standard in Japan. Wi-Fi function should be disabled when travelling outside Japan. Use in other countries may contravene local regulations.**
- **Bluetooth®/Wi-Fi shares the same frequency band with other industrial/scientific/medical equipment (microwave ovens, etc.), radio stations, amateur radio stations, etc. (hereinafter "other radio stations").**
  1 **Before using Bluetooth®/Wi-Fi function, visually check that there are no other radio stations sharing same frequency band nearby.**
  2 **Should interference occur between this handset and other radio stations, move to another place or stop Bluetooth®/Wi-Fi function (stop the transmission) immediately.**
  3 **For additional information and support, contact us at the following number.**

     From a SoftBank handset, call toll free at 157 for General Information.
     From landlines, see ☞P.19-34 "Customer Service".

Wireless Frequency Bands

- Bluetooth® frequency band information is as follows:

  | 2.4 FH 1 |

  - This radio station uses 2.4 GHz band with FH-SS modulation, and its maximum communication distance is 10 m.
  - This radio station uses 2400 – 2483.5 MHz band. Avoiding frequency band of mobile unit identification apparatus is not possible.

- Wi-Fi frequency band information is as follows:

  | 2.4 DS/OF 4 |
  - This radio station uses 2.4 GHz band with DS-SS/OFDM modulation, and its maximum communication distance is 40 m.
  - This radio station uses 2400 – 2483.5 MHz band. Avoiding frequency band of mobile unit identification apparatus is possible.

Precautions for Wi-Fi Usage

- **Do not use Wi-Fi function near magnetic devices or sources of magnetic waves.**
  - Magnetic waves or electrostatic noise may cause noise/interference (especially when a microwave oven is in use).
  - Wi-Fi use near TVs or radios may affect TV/radio reception.
  - When multiple access points using the same channel are nearby, target access point may not be found.

Waterproofing Precautions

With External Port Cap, Inner Cover and Battery Cover tightly closed, 942P provides waterproof performance compliant with IPX5 (former JIS Ingress Protection Code grade 5)[1] and IPX7 (former JIS Ingress Protection Code grade 7)[2].

[1] IPX5 compliant: Protection against water projection from water jets (projecting water from a 6.3 mm diameter nozzle at a distance of approximately 3 meters for over 3 minutes at a rate of 12.5 L/min from different directions).

[2] IPX7 compliant: Protection against water leakage when submerged under water (still tap water at room temperature up to 1 meter deep for approximately 30 minutes).

Note: Waterproof performance of 942P is not guaranteed under all conditions. Read User Guide for proper handset use. Malfunctions due to improper handling caused by customer are not covered by Warranty.

942P is available for use in rain or a bathroom or at a poolside.

■ Rain
- Talk on handset in moderately heavy rain (rainfall of 20 mm or less per hour).
- Do not use handset in heavy rain (rainfall of 20 mm or more per hour).

■ Rinse Handset
- Rinse handset in fresh water/tap water (at room temperature), using gentle back and forth movement; or under gentle running water (approximately 10 cm from faucet/showerhead at 5ºC to 35ºC).
- Tightly close Battery Cover and hold down External Port Cap when rinsing handset.
- Do not use brushes, sponges, soaps or detergents.

■ Leisure
- Do not immerse or drop handset into a swimming pool/sea. Do not use handset underwater.
- If pool/sea water spatters on handset, immediately rinse with tap water at room temperature.

■ Bathroom
- Do not immerse or drop handset into a bathtub. Do not use handset underwater.
- Do not immerse handset into water containing soap, detergent or bath agents or hot spring water.
- Do not expose handset to strong water flow (strong enough to feel pain on skin).
- Avoid using handset in a bathroom for a prolonged period of time.
- Extreme temperature changes can cause condensation. Wait until handset reaches room temperature before bringing it to a bathroom.

■ Kitchen
- Do not splash handset with or immerse it in any liquids (soap water, detergent, spice, juice, etc.) other than fresh water or tap water.
- Do not splash handset with or immerse it in hot/cold water. 942P is not heat-resistant.
- Do not expose handset to strong water flow.

Notes on Usage

● **Make sure that External Port Cap, Inner Cover and Battery Cover are tightly closed before use. If small particles (fine fiber, hair, sand, etc.) are caught between Battery Cover, Inner Cover and handset, water leakage may occur.**
● **If handset comes into contact with any liquids while External Port Cap, Inner Cover or Battery Cover is open, an electric shock or malfunction may occur. Turn off handset power and remove battery.**
● **Do not immerse handset in any liquids other than fresh water or tap water at room temperature.**
● **Regardless of handset performance, replacing handset parts every two years is recommended. Replace parts at your own expense. Contact SoftBank Mobile Customer Center, Customer Assistance (**Z**P.19-34) in your subscription area.**

■ Open External Port Cap

1 Use slot to lift cap off in the direction of ①, and rotate cap in the direction of ②.

② ① Slot
■ Close External Port Cap

1 Align cap with handset, and fit cap into port by holding cap base firmly.

2 Make sure cap is completely closed.

Maintaining Waterproof Performance

■ **Handset**
● **Do not leave handset wet.**
  • **Doing so may cause short circuit on External Port.**
  • **Water may leak into keypad or hinge. In cold climates, water drops turn into frost; this may cause malfunction.**
● **Do not wash handset in a washing machine.**
● **Handset is not heat resistant. Do not immerse handset in hot water, use it in a sauna or dry it with hot air using a dryer.**
● **Do not drop handset or subject it to excessive shock. Doing so may deteriorate waterproof performance.**
● **Handset does not float in water.**
● **Use handset within temperatures of 5ºC to 35ºC and humidity of 35% to 90% (limiting to temporary use in a bathroom within 36ºC to 40ºC). Do not use or store handset in extreme temperatures or areas under direct sunlight.**
● **Handset is not water-pressure resistant. Do not expose handset to strong water flow or immerse it in water.**
● **Do not place handset directly on beach.**
  • **Sand gets into holes of Microphone, Earpiece or Speaker, and volume may be decreased.**
  • **Sound may get distorted if water drops and sand are in handset.**

  • **Water leakage may occur if sand enters External Port Cap, Inner Cover or Battery Cover.**

■ **External Port Cap/Inner Cover/Battery Cover**
● **Do not open/close External Port Cap, Inner Cover or Battery Cover with gloves on. Small particles may adhere to rubber packing.**
● **Make sure External Port Cap, Inner Cover or Battery Cover areas are free of fine fibers after wiping off liquids.**
● **Do not remove rubber packing. Do not insert sharp-edged objects into gaps around External Port Cap, Inner Cover or Battery Cover. Doing so may cause water leakage.**
● **If External Port Cap or Inner Cover rubber packing is damaged or deformed, replace it with a new one.**

■ **Microphone/Earpiece/Speaker**
● **Do not pick Microphone, Earpiece or Speaker holes with sharp-edged objects.**
● **Thoroughly wipe off water drops; may cause malfunction.**

Draining Water from Handset

Using handset with water drops on may decrease Speaker/Earpiece volume or deteriorate sound quality. If water seeps into keypad or hinge area, remove water as follows:

1 Wipe water off handset with clean dry cloth.

2 Hold handset firmly. Shake handset about 20 times until no water drops come out. Repeat on all sides.

<Drain from Earpiece> <Drain from Microphone>

<Drain from Speaker>
3 Pat handset against a clean dry cloth to remove remaining water from Microphone, Earpiece, Speaker, keypad, hinge, etc.
● Do not directly wipe remaining water off gaps using a cotton swab.
4 Remove Battery Cover, and wipe water drops off Inner Cover area and Battery Cover rear side. Replace Battery Cover.

● Never open Inner Cover.
● To remove Battery Cover: ☞P.xliii

Inner Cover Area

Battery Cover Rear Side
● Some water may remain on handset even after above steps are followed. Keep handset away from anything that should not get wet.
● Water may remain inside Touch Pen Cap when it is wet.

Charging Battery

Accessories and other optional items are not waterproof. Check following points when/after charging battery.
● **Never charge battery when handset is wet. Doing so may cause an electric shock or malfunction/fire due to short circuit. Wipe water off handset with clean dry cloth before charging battery.**
● **Close External Port Cap tightly after charging battery. Use Desktop Holder to charge handset.**

Specific Absorption Rate (SAR)

942P meets the government's requirements for exposure to radio waves.

These requirements are based on scientific basis to assure that radio waves emitted from mobile phones and other handheld wireless devices do not affect human health. They require that the Specific Absorption Rate (SAR), which is the unit of measurement for the amount of radiofrequency absorbed by the head, shall not exceed 2 W/kg*. This limit includes a substantial safety margin designed to assure the safety of all persons, regardless of age or health, and meets the international standard set by International Commission on Non-Ionizing Radiation Protection (ICNIRP) in cooperation with World Health Organization (WHO).

All mobile phones, prior to product launch, must be certified as compliant with government requirements as stipulated by the Radio Law.

942P has been granted Technical Regulations Conformity Certification by TELECOM ENGINEERING CENTER. Its highest SAR value is 0.360 W/kg. This value was obtained by TELECOM ENGINEERING CENTER as part of the certification process. SAR tests were conducted with handset transmitting at its highest certified power level in accordance with testing methods set by the government. While there may be differences between the SAR levels for various handsets, they all meet the governmental requirements for safe exposure. The actual SAR level of the handset while operating can be well below the highest value. This is because the handset is designed to operate at multiple power levels so as to use only the power required to reach the Network.

Additional information on SAR can be obtained on the following Websites:

Ministry of Internal Affairs and Communications
http://www.tele.soumu.go.jp/e/sys/ele/index.htm
Association of Radio Industries and Businesses (ARIB)
http://www.arib-emf.org/ (Japanese only)

* Requirements are stipulated in Radio Law (Ordinance Regulating Radio Equipment, Article 14-2).

About Handset

USIM Card

About USIM Card

Universal Subscriber Identity Module (USIM) Card is an IC card containing customer and authentication information, including handset number, and limited Phone Book entry and SMS message storage. USIM must be inserted to use handset or Network services (calling, messaging, Internet, etc.). Turn handset off before inserting/removing USIM Card.

USIM Card

IC
- Insert USIM Card into other compatible SoftBank handset to use information saved on USIM Card.
- Use SoftBank specified USIM Card only; non-specified USIM Cards may not function properly.
- Do not insert USIM Card into other IC card devices. SoftBank is not liable for any resulting damages.
- Keep IC portion clean.
- Do not damage, carelessly touch or short-circuit IC chip; doing so may result in loss of data or malfunction.
- Remove dust/debris with a soft, dry cloth.
- Do not place labels, etc. on USIM Card; may cause failure.
- If handset is dropped/subjected to shock, handset may return to Standby. This is not a malfunction.
  If **USIM not inserted After power-off Insert USIM** appears, re-insert USIM Card properly then restart handset.

Important
- USIM Card is the property of SoftBank.
- Return USIM Card to SoftBank upon service cancellation.
- USIM Card will be reissued for a fee if lost or damaged.
- If USIM Card/handset with USIM Card inserted is lost or stolen, contact SoftBank Mobile Customer Center or Global Call Center (ﾏP.19-34).
- Back up USIM Card files. SoftBank is not liable for lost files.
- USIM Card specifications/performance may change without prior notice.
- Pre-installed S! Appli may be unusable while a different or replacement USIM Card is inserted into handset.
- Returned USIM Cards are recycled.

Note
- Some downloaded files may be inaccessible after upgrades/repairs, USIM Card/handset replacement.

USIM Card Installation

● Remove battery (P.1-15) then follow steps below (Attach Battery Cover: P.xxx/Remove Battery: P.1-xx).

Inserting

1 With IC chip down, insert USIM Card

Notch
Removing

1 Slide out USIM Card gently
Note

● Do not force USIM Card into or out of handset; may damage handset/ USIM Card.
● Be careful not to lose the removed USIM Card.
● Avoid touching USIM Card terminals or IC chip; doing so may hinder performance/USIM Card recognition.

USIM PINs

There are two USIM Card security codes: PIN & PIN2

● PIN and PIN2 are set to **9999** by default.
● PIN/PIN2 can be changed (P.12-3).

PIN	4 to 8-digit code used to prevent unauthorized handset use. ● When **PIN Authentication** is **ON** (P.12-2), PIN entry is required each time handset is turned on (with USIM Card inserted).
PIN2	Required to clear call times/costs or set maximum cost (P.18-9).

PIN Lock & Cancellation (PUK/PUK2)

PIN Lock or PIN2 Lock is activated if PIN or PIN2 is incorrectly entered three times. Cancel PIN Lock or PIN2 Lock by entering the PIN Unblocking Key (PUK/PUK2) (P.12-3).

● For information on PUK/PUK2, contact SoftBank Mobile Customer Center, General Information (P.19-34).

Note

● If PUK/PUK2 is incorrectly entered ten times, USIM Card is locked and handset is disabled. Write down PUK/PUK2.
● For procedures required to unlock USIM Card, contact SoftBank Mobile Customer Center, General Information (P.19-34).

About Battery

Before Charging

Charge battery before use or after a period of disuse (AC Charger sold separately).

● Charging Time & Operating Time Estimates: ☞P.19-26

About Battery

● Clean handset, battery & charger with dry cotton swab.
● Replace battery if operating time shortens noticeably.
● Charge battery at least once every six months.
● Use a case when carrying battery separately.

Charging

● Battery must be installed to charge it.
● It may take longer for charging when handset is on.
● Move charger away from TV/radio if interference occurs.

Battery Time

● Using handset in the following conditions may shorten battery time.
　・ Extreme temperatures
　・ Handset/battery/AC Charger terminals are dirty.
　・ Weak signal/out-of-range
　・ Handset is left mid-operation (not in Standby)
　・ Playing Music Player, Wi-Fi is on, TV or S! Appli is active, etc.
● Extending battery time
　Example:
　・ Turn Back Light Time **OFF** or set a shorter time for Power Saver mode (☞P.18-5)
　・ Select **OFF** for Key Tone (☞P.18-3)

When Battery Runs Out

● **Unless a Call is in Progress**
　A message appears and warning tone sounds for 10 seconds.
　Handset power turns off automatically after one minute; press any key except 　(　/　) to cancel warning tone manually. Charge or replace battery.
　・ If Manner Mode is active, nothing sounds.
　・ To stop warning tone, press 　(　/　) while handset is closed.

 During a Call
A message appears and warning tone sounds via Earpiece or Speaker. After 20 seconds, call ends and handset shuts down in one minute. Charge or replace battery.

Battery Strength Indicator

 Battery Strength indicator changes as remaining usage time decreases. Charge or replace battery when battery level is low (P.1-10) or a message appears on Display.

Battery Voltage

> Low battery warning message appears. Charge or replace battery immediately.

S! Addressbook Back-up

Back up Phone Book entries to S! Addressbook (network server); synchronize handset Phone Book with S! Addressbook; restore Phone Book after accidental loss/alteration.

 Separate subscription is required for this service.

Notes

 Fully charge battery beforehand (appears).
 Transmission fees apply to synchronization, backup and restoration.
 Restore cancels these Phone Book settings:
 Ringtone, Vibrator, Notification Light, Picture, Answer message.
 Subscription to the service activates Auto Sync Settings during network information retrieval to back up edited Phone Book entries. Note that initiating network information retrieval activates Auto Sync Settings even when Auto Sync Settings are **OFF**. When contract is terminated, check if Auto Sync Settings are **OFF** (P.4-11).
 S! Addressbook is deleted upon contract termination.
 Addresses saved in Address field on handset Phone Book are saved to building name field in S! Addressbook.
 When number of characters saved in S! Addressbook exceeds maximum number of characters savable on handset Phone Book, excess characters do not appear on handset Phone Book.

Synchronization/Back-up/Restoration

 Be careful of back-up/restoration timing or selecting a synchronization direction.
 When no handset Phone Book entries exist, executing regular update or selecting **Sync from Client** or **Backup** deletes S! Addressbook.
 When no S! Addressbook entries exist, executing regular update or selecting **Sync from Server** or **Restore** deletes all handset Phone Book entries.

Capacity Disparities

 When the number of savable items varies between handset Phone Book and S! Addressbook, synchronization reflects lower limit.

Transfer to New Handsets

 S! Addressbook Back-up-compatible 3G Handsets: Data remains.
 Other 3G Handsets: Service subscription and data remains, but data is not accessible via handset (accessible via PCs).
 V3/V4/V5/V6/V8 Series: Service subscription is terminated and data is deleted.

● Digital TV may be disabled if USIM Card is not installed or SoftBank subscription is terminated.
● SoftBank is not liable for damages from accidental loss/alteration of handset/microSD Card information.
Data saved to handset (TV Links, Channel List, etc.) cannot be restored after repairs or handset replacement. Back up important information.

Signal Reception Areas

TV signal reception may be poor in the following conditions:

● Too far from or close to broadcasting stations.
● Mountain areas or near tall buildings.
● In moving vehicles, underground, in tunnels, etc.
● Near high-voltage wires, neon lights, wireless base stations, railroad tracks or highways.
● Areas with numerous signal obstructions or areas where signal reception is blocked.

When Battery is Running Out

● Warning tone sounds and warning message appears if Digital TV is activated with low battery.
● When battery runs low while programs are on or being recorded, handset operates as follows:
　・While Viewing
　　Warning tone sounds, and confirmation appears.
　・While Recording
　　Response differs depending on **Rec. When Low Battery** (　P.18-15) setting.
　　Continue Recording ... Warning tone does not sound and confirmation does not appear.
　　Stop Recording ...Warning tone sounds and confirmation appears.
● Watching TV while charging may shorten battery life.
● If recording ends due to low battery, recorded portion is automatically saved.

Incoming Transmissions

TV pauses for incoming calls. Resume TV after call ends.
● Incoming calls do not interfere with recording.

Incoming Messages

Notification Light flashes for incoming messages while TV is active or recording is in progress. Ticker also appears in Display.
While ticker appears, press 　 to view messages. TV sound plays in background while viewing messages. Press 　 to return to previous window.
● Show or hide ticker (Mail Ticker Display: 　P18-15).
● When ticker is set to Off, TV pauses, incoming message window appears and ringtone sounds. Set Receiving Display (　P.18-22) to **Operation Preferred** to notify of incoming messages only with 　.

TV Antenna

Extend TV Antenna for optimal viewing.

● Adjust TV Antenna direction to optimize signal reception.
● Retract TV Antenna after viewing Digital TV.
