

FCC ID label location on top of module:

Underside of module:

Note on the label type and printing:

Labels are a form of plastic with the words and graphics created by a heat transfer process from a special ribbon roll which bonds into the surface of the plastic. The label is attached to the device using a permanent adhesive. Label durability has been tested to IEC 60950 1.7.11 and equivalent clause of IEC 62368.
