gin to Use

tall SIM Card and Battery

ase be sure to disconnect the phone with the adapter ore disassembling the battery.

arge the Battery

e phone will release the warning tone displaying the ufficient battery capacity with the indication of the empty tery icon when the battery capacity is lower.

Insert the adapter in AC electric outlet, connect the apter to the phone.

The symbol indication of charging the battery appears the screen.

Pull the adapter apart from the power supply socket and then pull the adapter out of the phone after completion of the charge.

sic Function

l

u can dial with several ways as follows:

- Input the phone number and then press **[Send1/Send2]** under the standby mode.
- Press **[Send1/Send2]** to dial a phone number listed in the recent call log under the standby mode.
- Press and hold numeric keys **[2]-[9]** to dial the shortcut phone number.
- Dial with the contact name or phone number in the phone book.

swer Incoming Call

u can perform as follows when there is an incoming call.

ss **[Send1/Send2]** to receive the incoming call. You
u use the earphone to answer the call when the generic
phone Press **[End]** to decline an incoming call.

nction During Call

u can use many functions during the call process.

tion During call

ss **<Options>** to use the following options:

- **Hold single call:** temporarily hold the current call.
- **End single call:** end the current call.
- ew **Call:** call the opposite party to build a Call to Many.
- **Phonebook:** enter in the phonebook menu.
- **Call history:** view the information of the missed, dialed or answered calls in SIM card 1 or 2.
- **Messaging:** enter in the SMS menu.
- **Sound recorder:** record the current call.
- **Mute:** open or close the mute mode.
- **DTMF:** open or close the DTMF function during the call.

unch or Close Hand-free Function

ss **<H-Free>/<H-Held>** to open or close the hand free
ction.

ange Text Input Method

ss **[**Alt**]** key to select the desired input methods:
ltitap abc, Multitap es, Multitap fr, Multitap ru, Multitap
, Multitap AR123, Multitap FA, Multitap HI, Numeric.

her operation

- Press key [**sym**] under all input methods to input the punctuation symbols.
- Press numeric key [**space**] to insert a space

6

character under all input methods

Press key [del] to delete the character.

Press key [↵] to switch to the next line.

Press key [↑] to switch English input; pressing other keys at the same time and then, enter the capital letters

Function of Functional List

Call center

Press **<Menu>** and select **Call center** under the standby mode if you are desired to enter in this function.

Call history

With this function, you can view the information of the missed, dialed or answered calls in SIM card 1 or 2.

Call settings

Call waiting: After this function is launched, the network will inform you for the newly incoming call during the call. Please contact with your network operator for details. Perform as follows:

- ✧ **Activate:** launch the Call Wait function.
- ✧ **Deactivate:** not launch this function.
- ✧ **Query status:** view the present status of this function.

Call divert: divert the incoming call of a service to a designated phone number under the presetting condition in the function of forwarding the network service. Please contact with your network supplier to launch this function.

Call barring: Set up the right of calling and answering. This function requires the network support. You can

launch or close the function.

Multimedia

With this function, you can perform the multimedia functions, such as snap, shoot or record the voice.

Press **<Menu>** and then select **Multimedia** under the standby mode if desired to enter in this function.

File manager

After the T-Flash card is inserted, there are 3 operating window pertaining to the file: Open, Format,Details. Please confirm the store path when opening the folder.

Camera

Please insert the T-Flash card before using this function.

Press the   **[LSK]** key to select it, enter in the camera window, press **[OK]** key to snap. Press the   **[LSK]** key to select the option and you can perform

The Camera Option

Press **<LSK>** to use the following options under the following view-finding window.

> **Photos:** enter in the album to view the photos.
> **Camera settings:** set the Shutter sound, EV, Night mode,Anti-flicker,Contrast,Delay timer, Cont. shot.
> **Image settings:**set the Image size and quality.
> **White balance:** adjust color balance of the photo.
> **Scene mode:** select the snapping mode.
> **Effect settings:** change the hues for the photos snapped in the normal mode.
> **Storage:** Set the path to preserve photos.
> **Restore default:** recover all settings into the initial values.

8

age viewer

u can view the photos snapped with the camera through
s function.

oto list option

lect a photo file and press **<Options>** under the photo
window and perform:

View: view the selected image.

Image information:view the details.

Browse style : Select browsing mode

Send: send the selected image file to multimedia

Use as: use the selected image file to the wallpaper,
to the screen saver, to power on display, to power
off display and call picture.

Rename: change the name of the image.

Delete: delete the selected image.

Sort by: sort the images by the name, type, time,
size or None.

Delete all files: delete all selected images.

Storage: Set the path to preserve photos.

leo recorder

ase insert the T-Flash card before using this function.
ess the left soft key to select it, enter in the Digital
mcorder window, press OK key to snap. Press the left
t key to select the Option and you can perform.

e Digital Video Camera Options

ess **<LSK>** under the video-finding window and perform:

Camcorder Settings: set up the video camera
parameters.

● **White balance:** select from options: Auto, Daylight,

9

Tungsten,Fluorescent,Cloudand Incandescence.

- **E V:** adjust the exposure to highlight the definition of the image.
- **Night mode:** set the function on or off.
- **Anti-flicker:**set the anti-flicker value.
  Video settings: set the video parameters.
- **Video quality:** select video quality.
  White balance: select from options: Auto, Daylight, Tungsten,Fluorescent, Cloudy and Incandescence.
  Effect settings: set the effect settings: Normal, Grayscale, Sepia ,Sepia green, Sepia blue and Color invert.
  Storage: Set the path to preserve video.
  Restore default: recover to the initial state.

leo player

ase insert the T-Flash card before using this function.

ter in the video player window, select a video file, press [LSK] key to select it, performing: Play, Send, Rename, lete, Delete all files, Sort by,storage.

Play: play the Video.

Send: send the selected video file to multimedia

Rename: change the name of the current video file.

Delete: delete the currently-selected video file.

Delete all files: delete all the currently-selected video files.

Sort by: sort the video files by menu: name, type, time 、size or None.

Storage: Set the path to preserve video.

10

dio player

u can enjoy the music with this function.

y Music

u can use the following keys during the play.

lect a music file, press **[LSK]** to use the following
ions:

> **Play:** play the currently-selected song.
>
> **Details:** view the detailed information of the
> currently-selected song.
>
> **Refresh list:** Update the music player list.
>
> **Settings:** set up the music player.

- **Pre. playlist:** Set the playlist path.
- **List auto gen:** set up to turn on/off the function.
- **Repeat:** set up to open/close in two menus: Single
  Song Cycle and All Songs Cycle.
- **Shuffle:** set up to open/close the function.
- **Background play:** set up to open/close the
  function.

und recorder

ss the **[LSK]** to select it, entering in the recorder
dow to record file.

cord file list option

lect a record file and press **<Options>** under the record
list window and perform:

> **New record:** New call recording.
>
> **List:** View recorded documents.
>
> **Play:** play the selected record file.
>
> **Append:** Selected to continue recording after the
> recording**.**

11

Rename: rename the selected record file.

Delete: delete the selected record file.

Delete all files: delete all record files.

Use as: send the record file To User Profile.

Send: send to multimedia message,

Settings: set up the storage location, file format,audio quality.

radio

can receive the FM broadcast with this function.

ceive FM Broadcast

ss **[OK]** under the radio window to receive the FM adcast.

Key	Function
OK	Press to enter FM radio recording function.
DOWN	Press to open or stop the radio.
Left	Press to previous channel. Press and hold to continuously tune up.
Right	Press to next channel. Press and hold to continuously tune up.
"*"	Press to decrease the volume.
"#"	Press to increase the volume.

Radio option

ss **<Options>** under the radio window to use the owing options:

Channel list: play, edit or delete the saved annels.

Manual input: manually input the channel to search.

Auto search: automatically search the channel.

Settings: Can set the background play, ldspeaker turn on/off,record formats: AMR / WAV, the dio quality low / high, recorded files are stored.

Record: Recording the current FM program.

Append: continuously record after the previous ord file and append it after the record file.

File list: list all recorded files.

onebook

u can save the phone number in the memories of SIM ds or phone.

Add new contact: With this function, you can add a new contact in the phonebook.

To SIM1/SIM2

To Phone

Send text message: send an SMS to the current contact.

Send Multimedia Message: send an MMS to the current contact.

Call: Call use SIM1 or SIM2 selected contact

IP dial: You can conduct SIM1/SIM2 IP dial for the entry if the SIM1/SIM2 IP dial function is activated.

Edit: edit the current contact.

Delete: delete the current contact.

Copy: You can copy the contact information to phone,SIM1,SIM2.

Move: move the contact from phone to the SIM card 1

13

or SIM 2, move the contact from SIM 1 to SIM 2 or phone, move the contact from SIM2 to SIM 1 or phone.

Add to Blacklist: Add to blacklist the contact.

ssaging

xt message/ Multimedia message

Input the SMS/MMS and press **\<Options\>** under the current window to perform:

- **Send to:** directly input the contact phone number or search a phone number of the receiver and finally press **Send** button.
- **Input method:** change the input method.
- **Insert template:** insert the template.
- **Advanced**: Insert the number,name,bookmark.
- **Save to Drafts:** save to SMS/MMS drafts.

ox

lect a SMS/MMS entry and press **\<Options\>** under the ox list window to perform:

View: view the SMS/ MMS.

Reply : reply the SMS/MMS to the sender.

Call sender: You can call the sender.

Forward: forward the entry to other;

Delete: delete the entry of the message;

Save: Add contacts to SIM1, SIM2, phone.

Advanced：

Use number: use the numbers in the message.

Use URL: you can open the website link in the SMS.

Use USSD: Use the data dial-up or send to voice call in the SMS.

14

afts

th this menu, you can create and save SMS/MMS as ift. You can perform for some SMS as follows:

View: view the SMS/MMS.

Send: send the selected SMS/MMS.

Edit: edit the sent SMS/MMS.

Delete: delete the selected SMS/MMS.

Delete all: delete all SMS/MMS in the Drafts.

tbox

lect a SMS/MMS entry and press <Option> under the box list window to perform:

View: view the SMS/MMS.

Resend: resend the selected SMS/MMS.

Edit: edit or revise the entry of the SMS/MMS.

Delete: delete the selected SMS/MMS.

Delete all: delete all SMS/MMS in the outbox.

mplates

th this function, you can make or use the quently-used SMS templates.

Use: create a new message from the template.

Edit: edit the selected template.

Remove: delete the selected template.

ssage settings

u can set UP various SMS service options with this ction.

Text message: Set up the SMS related settings.

Multimedia message: Set up the MMS related settings

Service message: can set the enable push, enable

15

service loading .

lendar

w the routines or the memo saved in the calendar.
e phone will prompt you with the related affairs in
sisting you to manage your daily schedule.

lect Date in Calendar

e screen will highlight the date of today after displays
monthly calendar when you enter in the calendar
ction.

Press **[Left/Right]** to move by day.

Press **[UP/DOWN]** to move by week.

lendar Option

ess **<Options>** under the calendar window to use the
owing options:

View: enter in the routines of the predetermined
date to view the event

View all: view the reminder, meeting, course.

Add event: create affairs under the selected date.

Delete event: delete the event.

Jump to date: return to the calendar window after
inputting the designated date with the cursor
stopping on the inputting date.

Go to today: Back to today date.

Go to weekly view: use the weekly view to see the
calendar.

irm

t that the alarm clock will ring at specific time with this
ction.

16

t up alarm clock

Select an alarm clock and enter into alarm clock setup window.

Set up the alarm clock with the following setting:

- ✧ Set the alarm clock status as on or off.
- ✧ Set the alarm clock time.
- ✧ Select the ring mode as Everyday, Once or Days.
- ✧ Select the Snooze time.
- ✧ Select alert type.

Press **<done>**.

lculator

u can conduct the basic arithmetic operations.

Input the first number.

Press one of directional keys to select the arithmetic operation sign.

Input the second number.

Press **[LSK]** or **[OK]** to view the calculation results.

ook reader

Open ebook: View the selected document.

Clean up bookshelf: Updated list of e-books.

Global settings: set the system contents of the default.

erating Environment

ase use the phone at applicable temperature range -

) to 50 .

Emergency Call

phone uses the wireless signal similarly with other eless phone and cannot be ensured to connect under cases. Thus, the important calls should do not rely on eless phone only, in stance medical emergency call.

FCC RF EXPOSURE INFORMATION:
WARNING!! Read this information before using your phone
In August 1986 the Federal Communications Commission (FCC) of the United States with its action in Report and Outer FCC 96-326 adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards. Use only the supplied or an approved antenna. Unauthorized antennas modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

BODY-WORN OPERATION:
This device was tested for typical body-worn operations with the back of the phone kept 1.5cm from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 1.5cm must be maintained between the user's body and the back of the phone, including the antenna, whether extended or retracted. Third-party belt-clips, holsters and similar accessories containing metallic components shall not be used. Body-worn accessories
that cannot maintain 1.5cm separation distance between the user's body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.
For more information about RF exposure, please visit the FCC website at www.fcc.gov

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for hand-held wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

<ANSIC95.1> (1992) / <NCRP Report 86> (1986) / <ICIMIRP> (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1). Nevertheless, we recommend that you use a hands-free kit with your phone (such as an earpiece or headset) to avoid potential exposure to RF energy. The design of your phone complies with the FCC guidelines (and those standards).

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

NORMAL POSITION:
Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

TIPS ON EFFICIENT OPERATION:
For your phone to operate most efficiently:
• Extend your antenna fully.
• Do not touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

Vehicle mounted external antenna (Optional, if available))
A minimum separation distance of 7.9 inches (20cm) must be maintained between the user / by stander and the vehicle mounted external antenna to satisfy FCC RF exposure requirements.

RF Exposure Information:

FCC RF Exposure requirements: The highest SAR value reported under this standard during product certification for use next to the body with the minimum separation distance of 1.5cm is 1.**500** W/kg, next to the head is **0.899** W/kg. This transmitter must not be collocated or operating in conjunction with any other antenna or transmitter.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help

Do not use the device with the environment which below minimum -10℃, the device may not work.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
