Press the shutter moment cell phone has a slight shaking;

Dark

Can't enter service menu May be your SIM card does not support services

Safety precautions:

- Use a wireless hands-free system ( Headphone, headset) with a low power Blue tooth emitter

- Make sure the cell phone has a low SAR

- Keep your calls short or send a text message (SMS) instead. This advice applies especially to children, adolescents and pregnant women

- Use cell phone when the signal quality is good

People having active medical implants should preferably keep the cell phone at least 15cm away from the implant

Do's and Don'ts for disposal e-waste

Do's:

- Ensure that an Authorized Person repairs your Symphony products

- Call Our Local Authorized Collection Centers to Dispose Lava products

- Always drop your used electronic products, batteries or any accessories thereof after the end of their life at nearest Authorized Collection Point or Collection Center.

- Separate the packaging material according to responsible waste disposal options and sorting for recycling.
- Always remove the battery from the product, when you do not intend to use the product anymore in the future.

Don'ts:

- Do not Dismantle your Symphony Product on your own
- Do not give your e-waste to KabbadiWala / Scrap Dealer/ Rag Pickers.
- Do not dispose-off the e-waste in landfills
- Never dump E-waste in garbage bins.
- Do not dispose of your product at municipal waste bins or rooms.
- Do not throw used batteries into household waste.

Consequences of improper handling and disposal of E-Waste

- Improper disposal of waste prevents natural resources from being re-used.
  - Some waste contains hazardous chemicals and if not disposed of properly may release toxins into the soil and water, and also releases greenhouse gases into the environment
  - If e-waste is not properly disposed of, it can threaten the health and well-being of humans and animals and it also has adverse effect on the environment.
  - Placing of batteries or devices on or in heating devices, such as microwave, ovens, stoves, or radiators and improper disposal of batteries may lead to explosion.
    - If the battery terminals are in contact with metal objects, it may cause a fire.
- Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
  - This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

- Specific Absorption Rate (SAR) information
- SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.
- Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC.
- For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that Contains no metal and that positions the handset a minimum of 1.5 cm from the body.
- Non-compliance with the above restrictions may result in violation of RF exposure guidelines.
