- Unplug the USB cable to resume normal function.
- You can delete the images on the right panel and click  to delete the corresponding photo on the device physically.

## 4 BATTERY REPLACEMENT

This device operates on two AAA batteries.

Be sure to read the following precautions before replacing batteries.

- 1) Turn off the unit before replacing batteries.
- 2) Remove the battery cover. Remove the old batteries and insert new batteries into the empty compartment with correct polarity.  
**Important: Be sure that the batteries are installed correctly. Wrong polarity may damage the unit.**
- 3) To prolong service time, we recommend the use of good quality batteries.
- 4) To avoid damage caused by battery leakage, replace battery every year regardless of how long of the unit has been operated.
- 5) Remove the batteries if the unit is not to be used for a long period of time.
- 6) Button Cell Battery can cause choking hazard if swallowed by children. Keep out of the reach of children.
- 7) Take care to fit the batteries correctly observing the positive (+) side of each battery is facing in the correct directions.
- 8) Never leave dead battery in the battery compartment.
- 9) Batteries should be replaced by an adult.

- 10) This supply terminal is not to be short-circuited.
- 11) Incorrectly using batteries can cause them to burst or leak, possibly damaging the interior of the unit.
- 12) Do not expose battery to direct heat, let them become shorted, or try to take them apart.
- 13) Only batteries of the same or equivalent type are to be used. Do not mix alkaline, standard (zinc carbon), or re-chargeable (nickel cadmium) batteries.
- 14) Replace whole set of batteries at one time, do not mix old and new batteries.
- 15) Make sure battery compartment is secure.
- 16) Never try to recharge the battery that comes with the unit.
- 17) Should a battery leak, clean out the battery compartment of the unit immediately, taking care to avoid letting battery fluid come into direct contact with your skin.

***Keep batteries out of reach of small children. If swallowed, consult with physician immediately.***

## **5 RESET THE UNIT**

- Reset the unit if it fails to respond.
- Insert the pointed end of a paper clip into the small round hole located directly below the word **RESET** on the rear cabinet. Push gently.

### **In Case of difficulty**

- Check the battery to ensure that it is fresh and properly installed.
- This product may need manual reset under a strong electrostatic discharge environment. Just follow the instruction described in this manual to set the function again for normal operation.

## **6 CARE AND MAINTENANCE**

- 1) Clean the unit with a soft damp cloth. Then wipe completely dry. Never clean with cleaning agent.
- 2) Do not drop your device or subject it to strong impacts.
- 3) Protect your device from rain and extreme temperatures
- 4) To avoid damage caused by leakage of the battery fluid, replace batteries once every year regardless of how much the unit has been used during that time.

## **FCC WARNING**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE: The manufacturer is not responsible for and radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.
