To whom it may concern:

EcoTech LLC, hereby requests a Permissive Change Class II of the radio equipment certification for the product name certification number, FCC ID: VKB271832. This product differs from the originally approved product in the following manor:

- (a) Associated digital circuitry. – The primary change was the BLDC driver, nothing else was changed that would affect output power, RF Circuit or Chassis.
- (b) Functional capabilities. – No Changes
- (c) Antenna Characteristics. – No Changes
- (d) Cosmetic differences – No Changes

I do attest that the Field strength and/or RF Output readings remained the same or are lower than the originally approved product and that they did not increase therefore qualifying this product for this application type.

Sincerely,

Patrick Clasen
