

PRIVACY RESTRICTIONS

Some countries require full disclosure of recorded telephone conversations, and stipulate that you must inform the person with whom you are speaking that the conversation is being recorded. Always obey the relevant laws and regulations of your country when using the recording feature of your Phone.

When using this product, the safety precautions below must be taken to offset possible legal liabilities and damages.

ELECTRICAL SAFETY

This product is intended for use when supplied with power from the battery. Other usage may be dangerous and will invalidate any approval given to this product.

SAFETY IN AIRCRAFTS

Due to the possible interference caused by this product to an aircraft's navigation system and its communications network, using this product on board an airplane is against the law in most countries.

ENVIRONMENT RESTRICTIONS

Do not use this product at gas or refueling stations. The use of this product is also prohibited in fuel storehouses, chemical plants, and locations containing explosives.

SAFETY FOR ENVIRONMENTS

Do not use this product in gas stations, fuel depots, chemical

plants or where blasting operations are in progress, or in potentially explosive atmospheres such as fuelling areas, below deck on boats, fuel or chemical transfer or storage facilities, and areas where the air contains chemicals or particles, such as grain, dust, or metal powders. Please be aware that Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

ROAD SAFETY

Vehicle drivers in motion are not permitted to use telephony services with handheld devices, except in the case of emergency. In some countries, using hand-free devices as an alternative is allowed.

INTERFERENCE WITH MEDICAL EQUIPMENT FUNCTIONS

This product may cause medical equipment to malfunction. The use of this device is forbidden in most hospitals and medical clinics.

NONIONIZING RADIATION

This product should be operated in the suggested normal condition only to ensure the radiative performance and safety of the interference. As with other mobile radio transmitting equipment, users are advised that for satisfactory operation of the equipment and for the safety of personnel, it is recommended that no part of the human body be allowed to come too close to the antenna during operation of the equipment.

Kitty Phone User's Manual

About this manual

Welcome to the Kitty Phone. [This manual contains two](#)

parts.

'Before you start'
'Operation Instruction'

Before using your Kitty-B, read 'Before you start' first

After you have become familiarized with its basic functionality, refer to the operation Instruction for detailed features, less common tasks, and for maintaining your KITTY-B Phone.

This manual can also serve as a source of information if you have problems operating your Kitty-B.

If the above content in this manual is not accordance with your mobile phone, please subject to your mobile phone.

Our company has the right to subject to amendment without notice.

4. Replaceable Cell Phone Cover

4.1 How to remove or install the battery cover

- a. Push downwards the battery cover to remove it.
- b. Get another battery cover to replace [it in the groove and then push it inward until it fix itself in the slot.](#)

5. Battery

5.1 How to attach the battery

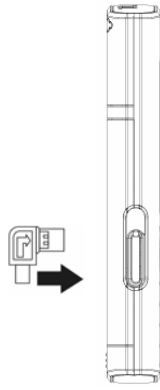

- a. Align the bottom of the battery with the slot in the bottom of the phone.
- b. Then sit the battery on the back of the phone until it clicks into place.

5.2 How to remove the battery

- a. Power off your phone first.
- b. Remove the battery cover.
- c. Unlock the battery using the battery release latch.

5.3 How to charge the battery

- a. Plug your charger in the wall socket.
- b. Connect the other end of the specified USB cable to the interface connector slot in the left top side of the handset.
(Or plug the specified charger into the connector slot on the bottom of the handset.)

! Note: The phone automatically detects the battery status while the charger is connecting phone.

- Full status, it automatically recharges the battery.
- Normally the phone completes battery charging in two hours or a little more.
- For a new or completely discharged battery, it takes at least 4 hours of charging to achieve optimum performance.
- You can make calls while charging your phone.
- Do not charge the phone without the battery in place.

6. SIM Card

SIM Card provides additional services and functions besides making a call.

These functions will only display and work on the menu of

the phone if your SIM card supports them.

Some menu may not be shown depending on the SIM card supplied.

The content and the terms of the function lists will depend on your network service provider.

Please contact your network service provider (a network operator or the service provider) regarding availability of services related to the SIM card, application information and the costs.

6.1 How to place the SIM card

Ensure the phone is powered off and the travel charger is detached first. The SIM card is installed on the back of the mobile phone.

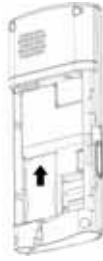

Slide the SIM card under the retention strap to insert it into the card slot as shown below:

6.2 How to remove the SIM card

Ensure the phone is powered off and the travel charger is detached first before removing the SIM card.

Follow the following diagram to remove the SIM card.

! Note: The SIM card is a computer chip containing information about your subscription, security, phonebook etc. When you register as a subscriber with GSM network operator, you are provided with the SIM card. Always handle the SIM card with care and insert with the gold contacts facing down.

7. T-Flash

T-Flash provides additional expandable memory for storage purpose. KITTY-B can support upto 1GB mini SD.

7.1 How to place the T-Flash

Ensure the phone is powered off and the travel charger is detached first before you start the following steps.

- a. Push the T-Flash holder in the direction of the arrow and hold it in this position.
- b. Insert a T-Flash under the two tabs on the right side of the phone, ensuring that the gold contact of the card face upward.
- c. Hold and push the T-Flash left direction and release the

rubber into place.

7.2 How to remove the T-Flash

Ensure the phone is switched off and the travel charger is detached first before you start the following steps.

- a. Remove the battery.
- b. Remove the T-Flash rubber and moving the T-Flash to right direction.
- c. Remove the T-Flash from the holder.
- d. [Close the T-Flash door.](#)

8. Headset

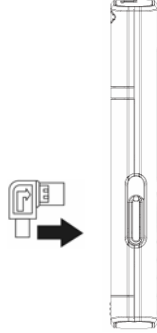

Insert the headset plug into the jack on the left side of your phone.

You can answer or end a call by pressing the hook button on the headset.

When you receive an incoming call while a call is in progress, you can answer the incoming call by pressing the hook button on the headset. (The first call is automatically put on hold.)

You can make the last number dialed call by pressing the hook button when the screen is idle.

The last number dialed is launched by pressing the hook button, and then the call will be made by pressing the hook button again.

! Note: If the headset is plugged in, your phone's standby time will be reduced. Therefore, please remove the headset when not in use.

B. Basic Operation

1. Power On/Off

To switch your phone On and Off, make sure that the battery is inserted.

- On power_off mode, Long press [END] until you hear the power-on melody.
- On power_on mode, Long press [END] until you hear the power-off melody.

! Note: Some SIM card may be protected with PIN. If Enter PIN is prompted, enter your PIN and then press [Ok].

2. Call Function

2.1 Making a Call

To make a call with your phone, insure that phone screen is idle mode, then key in the area code and phone number using the numeric keys and press [Send] & Menu confirmation key.

You can hear the connect tone when the call is answered by the called person, if you set the Connect tone to ON.

2.2 Making International Calls

Press and hold the “*” key twice to display “+” character.

Please Key in the country code, area code (without the leading zero) and the phone number. And then press [Send] & Menu confirmation key. The ‘+’ tells the network that the call is international.

2.3 Edit Phone Number

Key	Description
 [Right Soft Key] "Clear"	[Press] Delete a digit on the left side of cursor [Press and Hold] Delete all the digits
	Move the cursor to the digit you want to edit

2.4 Using Phonebook

You can store the names and phone numbers dialed regularly in the SIM card and phone memory.

- See Phonebook List: If you want to go to the phonebook list, press [Right Soft Key], and then choose the name what you want to find using Navi-Up & Down keys. Press [Send] to dial then when you want to make a call or press [Left Soft Key] to go to option menu.
- Search Phonebook: If you want to search phonebook list with special name, press navi-down key, and then enter the name what you want to find. Input full name or even a start letter and select "OK" menu. If there is the name you want to call, choose the name by moving navi-up & down key. Press [Send] key when you want to make a call or press [Left Soft Key] to go to option menu.

2.5 Making a Call from Message

You can make a call from message by choosing "Use Number" Menu in the option of "Inbox" after you read a message.

2.6 Redialing the last Number

The phone stores the last 20 numbers dialed. To recall any of these numbers, proceed as follows.

- Press the Dial key to display a list of the last numbers.
- Use Up & Down navigation keys to scroll through the numbers until the required number is highlighted.
- Dial the number highlighted

2.7 Ending a Call

When you have finished your call, briefly press [END] key.

2.8 Answering a Call

When you answer a call, the phone rings or vibrates according to the setting with the incoming call animation.

When the caller can be identified, the caller's phone number and name, if stored in phonebook, will be displayed. If the caller cannot be identified, only the caller's phone number will be displayed.

- If necessary, Press the Dial (also called send key) key. If the **Any key Answer** option is set to **ON**, you can press any key to answer a call except for the power on/off key.
 - To reject an incoming call, press [END] key or press

[Right Soft Key] to "Reject" call.

- End the call by closing the phone or pressing the [END] key.

2.9 Emergency Call

Ensure that the phone is switched on and in service.

Enter the emergency number (Official emergency number or another official emergency number) and press the Dial key. Give your location. Do not end the call until given permission to do so.

End the call by closing the cover or pressing the Menu exit key.

! Note: In the situation such as power-on that **Enter Lock Code** or **Enter PIN** is prompted, some network may not allow the emergency call and may request to insert SIM card.

2.10 Entering a "Pause" Character in a Dial String

A pause ("P") character may be entered into a dial string by pressing the left special function key("*") three times.

2.11 Adjusting Earpiece Volume

During a call, you can adjust the earpiece volume by pressing [Up] or [Down] navigation key.

2.12 Using the Earphone

If you insert the earphone to the jack of your phone, you can use it in the same way as your phone's earpiece and microphone.

You can answer or end a call by pressing the hook button on the earphone.

To answer another call while you are on the phone, you can answer the waiting call by pressing the hook button on the earphone.

3. Multimedia Function

3.1 Audio player

If you want to play MP3 file, please follow the procedure as below

- Choose "Multimedia" in Main Menu --> Multimedia --> Audio player shall play the audio files stored in the music file available in the phone or memory ,if you want to play the Audio file from other location you will have to select specific file to be played.
- Press [Left Soft Key] (List) to enter MP3 file list.
- Press [OK] to play MP3 file.

4. Text Input Mode

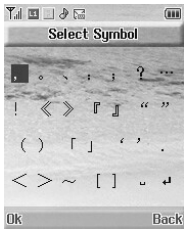

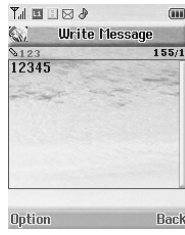

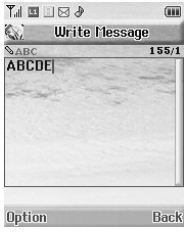

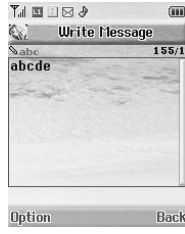

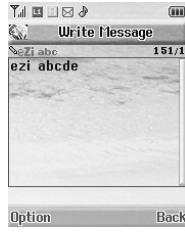

4.1 Text Input mode general

You can input and edit text by this phone.

5.2.2 Scroll to 'Add New Entry' and select it

5.2.3 Select the storage between "To SIM" and "To Phone."

5.2.4 Select a category to edit. To select the category, scroll to the category and press the [Edit] soft key (left).

5.3 Searching the phonebook list

5.3.1 From Idle Screen: Press the right soft key (name) on the idle mode. This menu shows the existing list and search window.

5.3.2 From Phonebook Menu: Choose Phonebook menu in Menu --> Phonebook --> Search. This menu shows the existing list and search window.

II. Operation Instruction

A. Menu Operation

1. Phonebook

Phonebook offers phonebook storage, management and services. You can access to the phonebook from idle screen, phonebook menu, and message writing modes.

From Idle screen, press [Menu] to enter Phonebook

function, it will display the phonebook data sorted by name in your SIM Card and phone memory.

From the Phonebook menu, you will have 8 sub menus as the following.

1.1 Quick Search

When you select the Search in the Phonebook menu, you will see all entries saved in the phonebook. This function allows you to search the phonebook data by name; simply type in alphabet(s), the phone will show you the search result dynamically.

From the phonebook list, you can also View, Edit, Delete, Copy, and Move the entry.

- IP Dial: You can dial the entry through the IP number.
- View: You can view the entry's contents such as name, number and so on.
- Edit: You can edit the entry items.
- Delete: You can delete the entry.
- Copy To SIM(Phone): You can copy the entry from SIM to Phone or from Phone to SIM. You will have the same entry in a different storage. (SIM + Phone)
- Move To SIM(Phone): You can move the entry from SIM to Phone or from Phone to SIM (SIM → Phone, Phone → SIM). Entry will be deleted from the original position and saved only in the destination location.
- Copy To Phone(SIM): You can copy the entry from Phone to Phone, or from SIM to SIM (SIM → SIM, Phone → Phone).

1.2 Search entry

You can input its name to search the entry from phonebook, and mobile will list all the entries with the same name.

1.3 Add New entry

You can add the new entry to SIM or Phone memory. Please see “**Storing a Number using the Phonebook Menu**”.

1.4 Copy all

You can copy all phonebook data from SIM card to Phone or from Phone to SIM. It is a useful function if you want to back up your phonebook data from a SIM card to your phone and vice versa.

1.5 Delete

You can delete all phonebook data in SIM card or Phone. In addition, you can delete the phonebook data one by one.

1.6 Caller Group

You can setup and edit Caller Group profiles as following.

- Group Name: Edit the group name and press the [Left Soft Key] to enter Option and select “Done” to save the changes.
- MIDI (MIDI 1 ~15 / None or Ring1~Ring10): Allows you to select the ring tone to be used when you receive a call from a person in the group. Scroll left and right with the navigation keys.
- Picture (Picture 1~4 / Select from file): Allows you to

select incoming call picture when you receive a call from a person in the group. Scroll with the navigation keys to change the picture and go to the next line to select. Or if you want to view and select, select the [Left Soft Key] to View and scroll with the left and right navigation keys, and then press [OK] to select the picture.

- Color Pattern(Color Pattern 1~6 /None):You can select Color Pattern 1~6 or None.
- Member List: After storing numbers in the phonebook, you can search them by Group. You can add or delete member(s) to the group member list. Press [Left Soft Key] to enter Option, then select "Add," it will display a phonebook list excluding the members already in the group. It is possible to set a member in multiple groups.

1.7 Extra Number

You can view and edit Owner number and SOS number.

- Owner Number: You can display your mobile phone number. Press [Left Soft Key] to enter Option, you can edit owner's name and phone number.
- Service dialing number:You can display Service dialing number.
!Note:This needs SIM card to support this function.
- SOS Number – lists up the SOS Number.

1.8 Settings

You can view and edit the management for the Phonebook

as following.

1.8.1 Memory Status

You can check how many entries are stored in the phonebook (SIM card and phone memories) or how much free space is remained.

!Note:It can save 300 entries in Phonebook.

1.8.2 Preferred Storage

You can set your preferred storage either to SIM or to Phone as default storage in the phonebook.

1.8.3 Fields

There are eight fields that you can set on or off in your phonebook entry.

Press [Left Soft Key] to turn on or off the field.

- Home Number
- Company Name
- Email Address
- Office Number
- Fax Number
- Birthday
- Associate Picture
- Associate Sound
- Caller Group

2. Messages

With this menu, you can use SMS, MMS, Voice Mail Server, and Broadcast message. These functions are available depending on network services that your service provider supports.

! Note: If you receive a call while you are writing a message, the message will be backup and after hanging up the call, the phone will display “write message” mode. You can finish the message without losing the data.

2.1 Messages

When the  icon appears on the status indicators area, it indicates that you have received a new message.

2.1.1 Write Message

With this menu, you can write a message.

2.1.1.1 SMS

Select “Text Message” menu in the “Write Message” menu.

You have Use Template, Insert Object, Format text, Insert PHB Number, Insert PHB name, Insert Bookmark, and Input method options.

After you complete the message, press [Left Soft Key] to enter Option and then select “Done”. Choose one of following options.

- Send Only: Send the message to the recipient phone number. It will not save the message.
- Save and Send: Save the message, and send it to the required recipient.
- Save to Drafts: Save the message to Drafts so that you can send it later.
- Send to Many: Send the message to multiple recipients. Select Edit List to add up to 10 recipient(s).
- Send By Group: Send the message to the Caller

Group. Select a Caller Group from the list.

You can input the number directly or get from the phonebook by pressing [Left Soft Key] to Search.

The phone will display the Message sending Successfully or Fail message on the screen for all recipients.

2.1.1.2 MMS

The MMS (multimedia messaging service), also called Photo Message, it allows end-users to send and receive messages containing multimedia content (including images, video, sound and text). It provides a rich media of personal multimedia messages from between mobile to mobile, and mobile to e-mail.

With this menu, you can write a message and insert Image, Sound, Attachment, and bookmark text.

Select "Multimedia Message" menu in the "Write Message" menu.

Make a message. You can edit To, CC, BCC, Subject, and Content.

You can input the number directly or get from the phonebook by pressing [Left Soft key] to Search].

After you complete the message,press [Left Soft Key] to enter Option and then select "Done." Choose one of following options.

- Send Only: Send the message. It will not save the message.
- Save and Send: Save the message, and send it to required recipient(s).

- Save to Drafts: Save the message to Drafts. You may send it later.
- Save as template: Save the message as Templates.
- Send Options: Validity Period, Delivery Report, Read Report, Priority
- Exit: Exits the Write Message, the phone will ask if you want to save the message.

The phone will display the Message sending Successfully or Fail [report](#) on the screen for all recipients.

2.1.2 Inbox

With this menu, you can view the new messages or the read messages.

It will display the sender's phone number or name (if stored in the Phonebook) on the list.

If you press [Ok] or [Left Soft Key], you can view the message contents.

Press [Left Soft Key] to execute the following options:

- Reply: You can reply to the sender.
- Forward: You can forward the message to others.
- Edit: You can edit the message, and send or save the edited message.
- Delete: You can delete the viewed message
- Delete all: You can delete the all messages.
- Use Number: You can call the sender back or save the number to the phonebook.
- Use URL: You can save URL to phonebook.
- Advanced (Copy to Phone / Move to Phone / Copy All Text Messages / Move All Text Messages)

2.1.3 Outbox

With this menu, you can view the sent or unsent messages you have saved.

Send, Edit, Delete, Delete All and Use Number options are available.

2.1.4 Sent

The Sent option displays the list of sent messages.

- Forward: You can send the selected message to others. The user could select this item and edit the recipient's address and subject before sending.
- Edit: You can edit the message, and send or save the edited message.
- Delete: You can delete the selected message.
- Delete all: You can delete all messages in Sent box.
- Use number: You extract all numbers from the selected message.
- Use URL: You can save URL to phonebook.
- Advanced (Copy to Phone / Move to Phone / Copy All Text Messages / Move All Text Messages)

2.1.5 Drafts

You can save your unsent message to Drafts. You can send the message in Drafts after finishing SMS/MMS writing.

Options on saved messages are as following:

- Send: Send the saved message to the recipient(s).
- Edit Message
- Delete: Delete the message.
- Delete All: Delete all messages in the [draft](#) box.

- Use Number: Dial or Save to Phonebook.
- Use URL: Save URL to phonebook.
- Advanced (Copy to Phone / Move to Phone / Copy All Text Messages / Move All Text Messages)

2.1.6 Delete folder

Delete the messages of Inbox, Outbox, Sent, Drafts and Delete All Folders.

2.1.7 Template

You can edit and delete message templates in this menu. You can store your frequently using messages up to 10. For example, "Call Me Now," "How about lunch," "How are you," and so forth. You can store up to 40 English letters in each template. You can use the Template by selecting "2. Use Template" option, when you write a SMS.

2.1.8 Message Settings

You can setup default Message Information: Profile Setting, Common Settings, Memory Status, Preferred Storage, and Preferred Bearer.

2.1.8.1 Text Message

- Profile Setting

Depending on your service provider and service plan, you can set the message profile setting.

You can edit the profile as following:

- Profile Name: Edit the profile name.
- Message Center Number: You have to get the number from your service provider.
- Valid Period: Choose from Maximum, 1 hour, 6

hours, 12 hours, 1 day, 3 days, 1 week

- Message Type: Choose from Fax, Page, E-mail, Text.

- Common Setting

You can set on or off the following common settings for SMS.

- Delivery Report: This allows you to set delivery report On or Off. When this function is set to On, the network informs you whether or not your message has been delivered.

- Reply Path: This allows the recipient of your Message to send you a reply via your message centre, if the network provides Message service. Press [Left Soft Key] to turn this option On and Off.

- Memory Status

This shows memory status of SMS in your SIM card or Phone.

- Preferred Storage

You can set your preferred storage for the SMS messages as SIM or Phone.

- Preferred Bearer

You can set your preferred Bearer for SMS.

Bearer options are "Prefer GPRS, Prefer GSM, GSM Only."

2.1.8.2 Multimedia Message

Within the MMS sub-menu, you can define default values on common parameters for mobile-originated

messages. By setting default values for MMS messages, you can experience a more comfortable service. You can set up the MMS related parameters for sending and retrieving the MMS messages.

- Compose

This sets up parameters when you compose MMS messages.

- Creation Mode: You can set the creation mode as Free or Restricted.
- Image Resizing: You can resize images.
- Auto Signature: You can set the auto signature.

- Send

This sets up parameters when you send MMS messages.

- Validity Period: You can select the period in which the service center try to deliver message. When the message expires, message center will not try to deliver the message. Maximum period is what service provider permits.
- Delivery Report: This allows you to set delivery report on or off. When this function is set to on, the network informs you whether or not your message has been delivered.
- Read Report: You can set whether to receive a read report from every recipient.
- Priority: You can set the priority (High, Normal or Low) of MMS message.
- Sliding Timing: You can set how long you want

the message to play. Input number(s) in seconds.

- Delivery Time: You can set how soon the phone will send your message. (Immediate, In One Hour, In 12 Hours or In 24 Hours)

- Retrieve

This sets up parameters when you retrieve MMS messages.

- Home Network (Immediate / Delayed / Rejected).
- Roaming (As Home / Delayed / Rejected).
- Read Report (On Request / Send / Never Send).
- Delivery Report: This allows you to set delivery report on or off. When this function is set to on, the network informs you whether or not your message has been delivered.

- Filters

You can filter MMS Messages by two categories as following.

- Anonymous (Allow / Reject)
- Advertisement (Allow/Reject)

- Server Profile

Select from profile list. You can activate the profile or edit the profile.

- Rename profile: Edit the profile name.
- Homepage: Enter URL
- Data Account: Select data account from the list.
- Connection Type:
 - ◆ WAP: To edit IP Address
 - ◆ HTTP: You can set the HTTP proxy server

address and port.

- User name: Enter user name.
- Password : Enter your password
- Memory Status
This shows usage count, total memory used, and remaining memory.

2.2 Voice Mail Server

Your phone is capable of dialing with voicemail server number (if provided by your network). If the voicemail has arrived, your phone displays new message in the idle screen and sets to inform you of the arrival. Select the Voice Mail from the list and press [Option] soft key (left). By Selecting the Edit option for editing the Voice Mail server number. By selecting the Connect to Voice option, your phone will dial to the configured number that has been stored in Voice Mail list. You can then listen to the voicemail.

! Note: Voice mail is a network feature. Please contact your service provider for more information.

2.3 Broadcast message.

Your phone supports Broadcast message, and you can receive, read,set language and set cell broadcast channel,and the forth.

- Receive Mode: Select it to On to enable receiving cell broadcast messages.
- Read Message: Read cell broadcast messages.
- Languages:Set the receiving language of cell broadcast

messages.

- Channel Setting: Set the cell broadcast channel.

! Note: Cell broadcast is provided by the Operator, please contact your Operator.

3. Call History

With this menu, you can identify 60 call records that you have dialed, received or missed.

It will display the number and name (if available), together with the date and time at which the call was made or received.

3.1 Missed Calls

This menu lets you view the last 20 missed calls.

In the missed calls list, you can view the details of the record by pressing the [Ok] soft key (left). In the view screen, you can make a call to the number by pressing the Dial key.

There are 6 options in Option menu as following:

- Delete: You can delete the record.
- Save to Phonebook: You can save the record to the phonebook.

- Edit: You can edit the number and save to the phonebook.
- Send SMS: SMS can be sent to the number selected.
- Send MMS: MMS can be sent to the number selected

3.2 Dialed Calls

This menu lets you view the last 20 dialed calls.

In the dialed calls list, you can view the details of the record by pressing the [Ok] soft key (left). In the view screen, you can make a call to the number by pressing the Dial key.

There are 6 options in Option menu as following;

- Delete: You can delete the record.
- Save to Phonebook: You can save the record to the phonebook.
- Dial: You can call back to the recorded number.
- Edit: You can edit the number and save to the phonebook.
- Send SMS: SMS can be sent to the number selected.
- Send MMS: MMS can be sent to the number selected.

3.3 Received Calls

This menu lets you see the last 20 received calls.

In the list of received calls, you can view the details of the record by pressing the [Ok] soft key (left). In the view screen, you can make a call to the number by pressing the Dial key.

There are 6 options in [Option] menu as following;

- Delete: You can delete the record.
- Save to Phone: You can save the record to the phonebook.
- Dial: You can call back to the recorded number.
- Edit: You can edit the number and save to the phonebook.
- Send SMS: SMS can be sent to the number selected.
- Send MMS: MMS can be sent to the number selected

3.4 Delete Call Log

This menu lets you delete all call data of each category at once. There are 4 categories of call as following.

- Missed Calls: Allows you to delete all missed call data.
- Dialed Calls: Allows you to delete all dialed call data.
- Received Calls: Allows you to delete all received call data.
- Delete All: Allows you to delete all calls data which includes Missed calls, received calls and dialed calls.

3.5 Call Time

This menu lets you view the timers for calls made and received. The following timers are available.

- Last Call Time: Total duration of the last call.
- Total Sent: Total duration of all calls made since the last reset.
- Total Received: Total duration of all calls received since the last reset.
- Reset All Time: Allows you to reset the call timers.

! Note: The actual time invoiced for calls by your service provider may vary, depending on network features, rounding-off for billing purposes and so forth.

3.6 Call Cost

You can view the cost of the last call, or of all calls. Costs are shown only if your network operator supports this service. The following 5 options are available.

- Last Call Cost: You can check the cost of the last call.

- Total Cost: You can check the cost of all calls.
- Max Cost: Enter PIN2 and input a limitation of the Max Cost.
- Reset Cost: You can reset the call cost.
- Price Per Unit: Enter PIN2 and input a limitation of the price per unit.

! Note: Not all SIM cards support this feature. The number of items in these lists depends on the contents of your SIM card.

3.7 SMS Counter

You can view the numbers of sent and received SMS.

3.8 GPRS Counter

You can view how many GPRS message has been sent and received, and reset the counter.

- Last Sent: You can view the last data sent detail through GPRS data packet service.
- Last Received: You can view the last data received detail through GPRS data packet service.
- All Sent: You can view the total data sent through GPRS data packet service from last reset.
- All Received: You can view the last data received detail through GPRS data packet service.
- Reset Counter: Allows you to reset the GPRS Counter.

3.9 Auto quick end:

You can set Auto Quick End as “On” or “Off”, and can set auto quick end time (1~9999s).

4. Settings

You can change settings for your phone using this menu. There are Phone Setup, Call Setup, Network Setup, Security Setup, and Restore Factory Settings sub menu.

4.1 Phone Setup

In Phone Setup, you can execute such operations as: Time and date, Schedule Power On/Off, Language, Display characteristic, Greeting Text, Speed dial, Shortcuts, Dedicated Key, Auto update of date and time, Flight mode and Misc Setting.

4.1.1 Time and Date

You can set time and date for your phone.

- Set Home City: This menu allows you to set a city as your home city from 57 cities list. Please select the closest city in the list.
- Set Time/Date: This menu allows you to set the current time and date displayed in the idle screen.

This allows you can register menu item to dedicate menu list.

You have more than 40 menu items and can register shortcut menu up to 10 items

! Note: refer to the menu 'Phone setup Dedicated key' regarding assign menu item to navigation keys.

4.1.8 Dedicated Key

This menu allows you to set the dedicated function

for the navigation key in the idle mode.

You can dedicate the Up/Down/Left/Right navigation keys to menus. Select from the menu lists, and press [Ok] key to change the dedicated menu.

! Note: Refer to the menu 'Shortcuts' regarding make up the menu list.

4.1.9 Auto update of Date and Time:

This menu allows the phone to update the current date and time automatically. You can turn on or off this function by pressing the [On] or [Off] left soft key.

4.1.10 Flight mode

This menu allows using the phone on flight. You can use the Phone Book, Multi Media, File Manager, Fun & Game, User Profiles and Organizer on flight.

1. Normal Mode
2. Flight Mode
3. Query When Power On

! Note: You cannot make or receive calls in this mode.

Though your phone has flight mode, on the airplane, it is forbidden to use phones. Because your phone has the auto power-on function, please check your alarm clock setting and ensure that your phone will not automatically power on during the flight.

4.1.11 Misc settings:

- LCD Backlight: You can customize the LCD

Backlight settings in this menu.

The LCD backlight is automatically off after no key input to save the battery life.

You can set the brightness and time by this menu. The backlight will be off after the time you set.

Time: 5 Sec to 60 Sec

4.2 Call Setup

The following Call Setup features are network services. Please contact your network service provider to check availability and subscribe to the feature if you wish.

4.2.1 Caller ID

This network service informs your Caller ID to the recipient when you call out.

You can set the following options for the Caller ID function as following.

- Set by Network: The network will decide whether to send or hide the Caller ID.
- Hide ID: If you do not want to send your phone number, select [Hide ID] menu.
- Send ID: It will send the Caller ID when you call out.

! Note: Some networks do not allow the user to change this setting.

4.2.2 Call Waiting

This network service informs when someone is trying to reach you during another call. You can specify the call waiting option for voice calls only.

The following options for each service are available:

- Activate: activates the call waiting service.
- Deactivate: deactivates the call waiting service.
- Query Status: displays the status of the call waiting service.

4.2.3 Call Divert

This network service reroutes incoming calls to the number that you specify. Example: you may wish to divert your business calls to a colleague while you are busy. Call diverting can be set up in the following ways.

You must enter a forward number when you have incoming call(s).

- All Voice Calls: diverts all voice calls.
- If Unreachable: diverts calls, if you are not in a coverage area of your service provider.
- If No Answer: diverts calls, if you do not answer the phone.
- If Busy: diverts calls, if you are already making another call.
- All Data Calls: diverts all data calls.
- Cancel All Divert: cancels all call diverting options.

4.2.4 Call Barring

This network service allows you to restrict your calls. Call barring can be set up in the following ways:

- Outgoing Calls
 - All Calls: prohibits outgoing calls.

- International Calls: prohibits outgoing International calls.
- International Calls except to Home PLMN: When abroad, you can only make a call to numbers within the current country and to your home country that is the country where your home network provider is located.
- Incoming Calls
 - All Calls: prohibits receiving all incoming calls.
 - When Roaming: prohibits receiving calls when you are using your phone outside of your home service area.
- Cancel All: Deactivated all call barring settings. You will be able to make and receive calls normally.
- Change Barring PW: You can set and change the call barring password obtained from your service provider using this option. You must enter the current password before you can specify a new one.

4.2.5 Line Switching

You can select line1 or line2.

! Note:Choose Line1,it is on the normal state of calling;Choose Line2, you can only accept the incoming call but can't send the outgoing call.

You can set main modules as “On” or “Off”, including: Phonebook, Message, Call logs, File manager, Sound Recorder and Audio player. For example, if you set “Phonebook ” as “On”,every time you enter “Phonebook” from Main Menu or the idle, you have to input the cipher password.

4.5 Restore Factory Settings

This feature would reset the telephone to the same settings as those configured at the factory. You will need to input password to restore factory settings. Factory default password is “1122”.

4.6 Emergent Rescue

If you have turned on “Insurance against theft” and saved the control phone number, you can activate one of the three default rescue messages, when you meet with emergency, please long press [0] in the idle, and the phone will send the specified rescue message to the control phone number, the other will help you as soon as possible.

5. Multimedia

The Multimedia menu provides you several multimedia functions. You can enjoy your phone as multimedia device.

5.1 Audio Player

You can listen to MP3 music files with the Audio Player.

Two ways to access to the Audio Player:

- By selecting Menu --> Multimedia --> Audio player.
- Menu --> file manager --> Phone/Memory card --> open to play one file at a time.

To view the music list, press [List Soft Key]. It will display available music list from the Phone depending on **Player List** setting. To play the music, press [Left] or [Right] navigation key, or press [Option] soft key and select "Play".

The following Options are available:

- Settings:
 - Press Play List (from phone/card): You can search the play list from phone or memory card.
 - List Auto Generation (On/Off): you can select whether to generate the music list automatically or manually.
 - Repeat (One/All/Off): Set repeat option. When you select one or all, it will repeat the selected file or all music files. When you select this option to "Off", it can play only the current music file one time and stop.
 - Shuffle (On/Off): Set the shuffle feature on or off. This function is useful if you want to listen to the music in random order rather than from first file to the last.
 - Background Play (On/Off): Set the Audio Player to play the music while you are using the phone other than audio player, such as menu navigation.

- Sound Effects: Set the Equalizer: (Normal / Bass / Dance / Classical / Treble / Party / Pop / Rock).

5.2 Sound Recorder

With this menu, you can record sound in AMR and WAV format and use it as voice memo, ring tone and MMS attachment.

- When there is no record file in the Sound Recorder, there are two options:
 - Record: Start recording
 - Settings: Under setting there are three options i.e. Preferred storage, File format and audio quality.
 - ◆ Preferred storage (Phone/Memory)
 - ◆ File format (AWB/AMR/WAV)
 - ◆ Audio quality (High/Low)
- If you have more than one record file, there are 8 options:
 - Record : Start recording
 - Play: when there is a file in the list, it will play the recorded sound file.
 - Append: Record right after the selected sound file.
 - Rename: Change the file name.
 - Delete: Delete the selected file.
 - Delete All: Delete all files in the sound record list.
 - Settings: Select recording the sound in AMR, AWB and WAV format.
 - Forward
 - ◆ To User Profile: allows you to use the sound file as a Ring Tone.

- ◆ To MMS: allows you to write an MMS message with the selected sound file.

5.3 FM Radio

Listen to the FM radio. Connect the headset to the phone as it works as the antenna.

To search for a broadcasting frequency, you can use Preset Auto Search or press [Left] or [Right] navigation key to move 0.1 MHz.

5.3.1 Radio Options

You can access to the more functions by pressing the [Option] soft key (left) for the following options and settings for the Radio.

- Channel List: Save up to 30 radio channels. It can be edited manually, or list the result of Auto Search.
- Manual Input: Use  ~  and  to input a frequency of the desired radio channel manually.
- Preset Auto Search: Use this function to start the channel search automatically, when the channels are found, Searching stops, and these preset channels display in channel list.
- Settings:
 - Background Play: Listen to the radio while you are using the phone other than FM Radio, such as Message Interface.
 - Loud Speaker: Use the speaker.
 - Record format: You can set the format of the recorded files.

- Audio quality: You can set audio quality of the recorded files, e.g. High or Low.
- Record storage: You can set storage location of the recorded files, e.g. Phone or Memory Card.
- Channel effect: You can set channel effect, e.g. Stereo or Mono.
- Record: During listening to FM Radio, you can record in-phrase.
- Append: You can append the recorded files with the format of Amr, the latter sound will be appended behind the previous sound.
- File list: You can go to the list of the recorded FM radio files.

! Note: While using this function, you have to keep the headset connected to the phone.

5.4 Schedule FM record

After you enter this feature, you can edit FM Record Schedule, On Schedule FM Record, you can execute the followings, and then save this schedule. When you start FM Radio with earphone plugging in, it will carry out the Schedule FM Record.

- Schedule FM Record: On/ Off.

You need to check the Message Center option in Message Setup menu.

11. If all audible key tones are muted and all audible alerts

are changed to vibrator alert.

You need to check the Silence Mode setting.

By long pressing [#] on the idle screen to change between “General” and “Silent”, you can escape or enter the mode.

C. Safety Information

For the efficient and safe operation of your phone, observe these manual-lines.

1. Everyday Use of Your Phone

For normal operating position, hold your phone as you would any other telephone, with the antenna pointed up and over your shoulder.

Do not touch the antenna unnecessarily when your phone is in use, as this will affect call quality and may cause the phone to operate at a higher power level than otherwise needed.

As with any other radio transmitting equipment, you are advised that for the satisfactory operation of your phone and for your own safety, you should use your phone only in the normal operating position.

2. Using Your Phone in a Vehicle

Safety comes first, and is the ultimate responsibility of the driver. Please:

Give full attention to driving – driving safely is your first responsibility.

Use Hands-free Kit, if available.

If you have those kits make sure it is done pre-programmed numbers where possible, and keeping calls brief and to a minimum.

If you don't have a Hands-free Kit, pull off the road and park your vehicle before making or answering a call in driving conditions so require.

3. Non-ionizing Radiation (exposure to Radio Frequency Signals)

Your phone is a low power radio transmitter and receiver. When it is on, it receives and also sends the radio frequency (RF) signals. Most modern electronic equipment is shielded from RF signals. However, certain electronic equipment may not be shielded against the RF signals from your mobile phone. RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Consult your vehicle manufacturer and the manufacturer of any equipment that has been added to the vehicle.

4. Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of six inches be maintained between a mobile phone and a pacemaker to avoid potential interference with the pacemaker. Users with pacemakers:

Always keep your phone at least 20 cm (6inches) from your pacemakers when the phone is switched on.
Do not carry your phone in your breast pocket.

Use the ear opposite the pacemakers to minimize the potential for interference.

Switch off your phone immediately if you suspect that interference is being caused.

5. Hearing Aids

Some mobile phones, including your mobile phone, may interfere with certain hearing aids. In the event of such interference you may consult the hearing manufacturer to discuss alternatives.

6. Other Medical Devices

If you use any other medical devices, please consult a physician or the manufacturer of the medical devices to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information. Always check the regulations of the healthcare facilities, which generally request that all mobiles are switched off on entry.

7. Operating Environment

Remember to follow any special regulations in force in any area, and always turn off your phone wherever it is forbidden to use it, or when it may cause interference or danger.

8. Aircraft Safety

FCC regulations prohibit using your phone while in the air. Switch off your phone before boarding an aircraft.

9. Explosive Atmospheres and Materials

Turn your phone off and do not remove the battery when in any area with a potential explosive atmosphere and obey all signs and instructions. You must observe restrictions on the use of radio equipment in fuel depots; below deck on boats; fuel or chemical transfer or storage facilities; areas where the air contains chemicals or particles, such as grain, dust, or metal powders; areas with signs about explosive atmospheres or where blasting operations are in progress; any other areas where you would normally be advised to turn off your vehicle engines.

10. For Vehicle Equipped with an Air Bag

All air bags inflate with great force. Do not place objects, including both installed and portable wireless equipment, in the area over the air bag or in the air bag development area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

11. Battery Charging

Do not charge the phone without the battery in place.

Federal Communications Commission (FCC) Statement

You are cautioned that changes or modifications not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

Operation is subject to the following two conditions:

- 1) this device may not cause harmful interference and
- 2) this device must accept any interference, including interference that may cause undesired operation of the device.

FCC RF Radiation Exposure Statement:

For body worn operation, this phone has been tested and meets FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the handset a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines."
