Overall Assessment Letter for Competition-Pool Inc TMT-53590
FCC id: VXRTMT53590

I have reviewed this application and find it compliant.

This is an original application for a wireless thermometer transmitter. The equipment is a short range device operating at 433.92 MHz which is used for temperature detection of swimming pools.

Please note the following:

The operational description was not provided up-front however they have been provided.

1: Block Diagram

The block diagram was initially provided in Chinese and this was subsequently updated to English.

2: Internal Photos

The internal photos did not initially show both the front and back of the PC board, however the internal photo exhibit was subsequently updated and submitted.

3: User Manual

The user manual has been updated to include FCC CFR47 Part 15.105(b) statements.

I underwent the FCC RF exposure training at BABT in July 2007.

Yours sincerely

Vina Kerai
Compliance Engineer, BABT
