

EW 17-5012 06.08.2021 - JBE	Declaration Equality of M410 and M610 Lock Controllers	
--------------------------------	--	---

Declaration of Product Equality

We hereby confirm the equality of the electronics controlling the Locks "M410 TA03" and "M610 TA03" (PCB Marking "15044401 LUST32", product code "SLI2CBM6").

The LUST32 PCBA for the M410 Lock is an assembly variant of the PCBA for the M610 Lock. The M410 foregoes connector and circuit protection for the M610's second battery. The complete M410 lock contains an extra limit switch, which is hooked up via a connector populated on both versions.
