Description for mirror

This MIRROR PCBA is ONESOFT company designed specifically for the LG. Compares with the previous MIRROR version, This design uses the SMI's latest USB controller chips (SM3255), Product has compact structure, highly compatibility, and best performance intended for supporting SLC & MLC NAND type Flash memory. And also has "Write Protect" function, PC boot-up, Password protection, and Secured Partitioning functions. The Product also delivers extremely high data transfer rate and correct data through reliable 13/24/48-bit ECC engine for the coverage of the MLC flash read/write disturbance.
