

March 12, 2012

Timco Engineering, Inc.
Telecommunication Certification Body
849 NW State Road 45
Newberry, FL 32669

**SUBJECT: HME Wireless, Inc.
FCC ID: WDC-TRKSMT
Part 2.933 - Change in ID
Response to TCB Comments
Timco Job No.: 475UC12**

1. Pt 2.933(b): The letter from Applicant HME is not acceptable for compliance with 2.1933 (b)(1), (2), (3), and (4). Please submit a revised cover letter that addresses all these items.
[Celltech Response: Please refer to the applicant's revised cover letter exhibit submitted herein.](#)
2. External photos: The photos are different from those of the original filing.
 - a. Please explain. Alternatively, please have the applicant submit a cover letter describing in details the differences, etc.
 - b. Please submit internal photos to support claim that the device under this new FCC ID is electrically identical to that of the original filing.

[Celltech Response: The external photos were inadvertently submitted of the Guest Tag instead of the Reference Tag \(see page 3 of the user manual\). This Change in ID application is intended for the Reference Tag, which is identical to the originally certified device under FCC ID: UL3PT100. Please refer to the revised External DUT Photos exhibit and revised Label and Location exhibit submitted herein. The Guest Tag performs the same basic functionality and intended usage as the Reference Tag, however will be contained in a minimally different housing \(per applicant's revised attestation letter\). FCC Compliance of the Guest Tag will be addressed under a Class I Permissive Change to FCC ID: WDC-TRKSMT.](#)

3. Users manual: It identifies products other than the device subject to equipment authorization under the above referenced FCCID. Please explain (cover letter) whether these products comply with FCC rules and complete relevant items in 731 Form Item 12.

[Celltech Response: Please refer to response item 2 above for the Reference Tag and Guest Tag products listed in the user manual. The TrackSmart Gateway product listed in the user manual is previously certified under FCC ID: UL3G100A. Please refer to the revised Form 731 submitted herein.](#)

If you have any further questions or comments concerning the above, please contact the undersigned.

Sincerely,

Jon Hughes
Project Manager
Celltech Labs Inc.

cc: HME Wireless, Inc.
