

VISONIC
TOWER 20

A photograph of a Visonic Tower 20 surveying instrument. The instrument is a white, boxy device with a lens and a sensor, sitting on a black table with a grid-patterned top. A white sign with black text is attached to the front of the table. In the background, there is a rooftop structure with a white pillar and a yellow surveying instrument on a tripod. The scene is lit by bright sunlight, creating a strong glow and long shadows.
