

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a white plastic housing. A printed circuit board (PCB) is visible, populated with various electronic components including resistors, capacitors, and integrated circuits. Wires of various colors (yellow, green, red, black) are connected to the board. A black ruler with white markings is placed vertically to the left of the housing for scale. The background is a blue textured surface.
Solder Board-Component View 1	 A close-up photograph of the PCB components. A black ruler with white markings is placed vertically to the left of the board for scale. The components include a large blue electrolytic capacitor, several resistors, and integrated circuits. The board is populated with various electronic components, including resistors, capacitors, and integrated circuits. Wires are connected to the board. The background is a blue textured surface.

Solder Board-Component View 4	 A photograph showing a rectangular silver-colored component, likely a solder mask or a small board, placed on a blue textured surface. A black ruler with white markings is positioned horizontally below the component, showing measurements in millimeters. The ruler is oriented vertically in the image, with the 0 mm mark at the top and the 100 mm mark at the bottom.
Solder Board-Component View 5	 A photograph showing a small electronic board with various components, including capacitors, resistors, and a connector. The board is placed on a blue textured surface. A black ruler with white markings is positioned horizontally below the board, showing measurements in millimeters. The ruler is oriented vertically in the image, with the 0 mm mark at the top and the 100 mm mark at the bottom.
