

APPLICANT: Shenzhen PowerMagic Communication Co., Ltd.
FCC ID: XDH002

The theory of PM-T200:

1. Receive module: responsible for communication with transmit module (PM-R200), and transmit the message. Main frequency is 26MHz.
2. Power circuit: To provide steady power to around circuit
3. The antenna is on the PCB layout, the antenna gain is 0dBi.
