GlobalTrak Assembly 203026, E-Seal with ZigBee Interface V2 Operational Description

The GlobalTrak Assembly 203026, E-Seal with ZigBee Interface V2 provides enhanced security for GlobalTrak Asset Monitoring Units. It is a CT-PAT electronic barrier seal that is used in conjunction with an Asset Monitoring Unit, and not as a standalone device. It communicates position and seal status via ZigBee, and will generate a notification when the bolt seal is cut.
