

ION-M7P/8P S Tune-Up Procedure

Gain for the ION-M7P/8P S is set at the factory and no provisions are made for user accessible controls. Output power is a function of the input power and the fixed gain of the ION-M7P/9P S.

The user should provide an input signal that will produce an output power not exceeding the levels included in the product data sheet for the ION-M7P/8P S remote.
