11 Safety Precautions

Before using the phone, please read the safety precautions carefully and let your children know these, so that you can use your phone correctly and safely.

| | |
|---|---|
|  | Do not switch on your phone when phone use is prohibited or when phone use may cause interference or danger. |
|  | Do not use your phone while driving. |
|  | Follow the rules or regulations in hospitals and health care facilities. Switch off your phone near medical apparatus. |
|  | Switch off your phone in an aircraft. The phone may cause interference to control signals of the aircraft. |
|  | Switch off your phone near high-precision electronic devices. The phone may affect the performance of these devices. |
|  | Do not attempt to disassemble your phone or its accessories. Only qualified personnel are allowed to service or repair the phone. |
|  | Do not place your phone or its accessories in containers with strong electromagnetic field. |
|  | Do not place magnetic storage media near your phone. Radiation from the phone may delete the information stored on them. |

| | |
|---|---|
|  | Do not put your phone in a high-temperature place or use it in a place with flammable gas such as a gas station. |
|  | Keep your phone and its accessories away from children. Do not allow children to use your phone without guidance. |
|  | Use approved batteries and chargers only to avoid explosion. |

12 Cleaning and Maintenance

- The mobile phone, battery and charger are not water resistant. Please do not use them in the bathroom or other excessively moist areas and likewise avoid allowing them to get wet in the rain.
- Use a soft, dry cloth to clean the mobile phone, battery and charger.
- Please do not use alcohol, thinner, benzene or other solvents to wipe the mobile phone. A dirty outlet will cause poor electrical contact, loss of power and even inability to recharge. Please clean regularly.

13 Technical Information

Phone

| Continuous standby time * | 350-380hrs |
| Continuous calling time | 1.5-2hrs |

* Depending on the network

Travel Charger

| | |
|--------|---------------|
| Input | 100~240VAC |
| Output | 5.0VDC, 550mA |

Operation Temperature -10~+55 °C

Note:

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types X10 (FCC ID: XUMPREX10) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 0.868 W/kg and when properly worn on the body is 0.323W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If

this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: - Reorient or relocate the receiving antenna. - Increase the separation between the equipment and receiver. -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -Consult the dealer or an experienced radio/TV technician for help.
