Starting up

Installing battery

NOTE **Notes:**

• **The phone automatically switches off if the battery voltage is too low.**

• **When not using the battery for a long period, remove it from the phone and store it in a cool dry place.**

1. Press and hold **End Key** to turn off the phone.

2. Slide down the battery cover.
3. Insert the battery carefully with the contacts located against the gold springs.

4. Push down the battery until it clicks into place.
5. Place the battery cover onto the back of your phone.
⚠️ **Caution:**

Do not force the cover down by pressing on it. This will damage the cover.

Removing battery

1. Power off your phone.

2. Slide down the battery cover.

3. Lift the battery away from the phone.

Inserting (U)SIM card

You can obtain a (U)SIM card from your service provider when you sign on as a subscriber.

⚠️ **Caution:**

• **Do not bend or scratch your (U)SIM card. Keep the card away from electricity and magnetism.**

• **Don't touch the metal surface of the (U)SIM card in case that information in the card may be lost or destroyed.**

• **Make sure to disconnect the charger and other accessories from your phone and remove the battery before inserting and removing your (U)SIM card.**

1. Press and hold the **End Key** to power off the phone.

2. Slide down the battery cover and remove the battery.

3. Insert the (U)SIM card into the card holder, with the metal contacts facing downward and the cut corner at the top left. Make sure that it is pushed all the way to the down as shown below.
4. Place the battery cover onto the back of your phone.

5. Push the card until it clicks into position.

Notes:

• **The charger and other accessories should be disconnected from your phone before you insert or remove the (U)SIM card.**

• **When inserting the (U)SIM card, make sure that the metal contacts face downward and the cut corner is at the top left.**

Removing (U)SIM card

1. Press and hold the **End Key** to power off the phone.

2. Slide down the battery cover and remove the battery.

3. Remove (U)SIM card gently from the card holder .

Inserting memory card

The external memory card gives your handset a very large memory capacity. This allows you to save multimedia data, including images, photos, MP3 audio files, and ring tones. You can also use this memory card to store any other files.

Tips:

Your phone can support an external memory card with capacity up to 8GB.

1. Press and hold the **End Key** to power off the phone.

2. Slide down the battery cover and remove the battery.

3. Slide down the external memory card holder (1) to release the lock and raise the card holder.

4. Carefully insert the external memory card (2) as shown below.

5. Place the card into position, lower the card holder and lock by sliding the holder up.

6. Re-insert the battery, close the back cover and switch the handset on.
⚠ **Caution:**

Only use approved memory cards for this device. Any use of unapproved memory cards may cause loss of data or damage to your phone.

Removing memory card

1. Press and hold the **End Key** to power off the phone.

2. Slide down the cover and remove the battery.

3. Slide down the external memory card holder to release the lock and raise the card holder.

4. Carefully remove the external memory card.

5. Re-insert the battery, close the back cover and switch the handset on.

 Tips:

• **Do not remove the memory card while reading or writing to the card. Doing so may cause data corruption on the card or phone. If possible, insert and remove the memory card while the phone is powered off.**

• **If you want to format memory card on your PC, please select FAT Formatting type. Otherwise it might cause the memory card not identified by your phone.**

Connecting accessories

You can connect your headset to your phone to answer the call and listen to the music. You can also tie a wrist strap with your phone.

Connect the headset to your phone

Insert the headset to the **Headset port**.

Connect the data cable to your phone

Plug the smaller end of the cable into the **USB connection jack** at the right side of the phone, and the bigger end into the USB port of the computer.

Tie a wrist strap with your phone

Thread a strap as shown, and tighten it.

Power on/off

Notes:

Do not power on your phone if wireless phone use is unapproved, or when it may cause interference or danger.

1. Press and hold **End Key** to turn the phone on

   Tips:

   ▸ **When being asked, enter your PIN (Personal Identification Number) code or handset code and press the OK Key to confirm.**

   ▸ **The PIN code is the password provided by your network service provider. You need this password to use the (U)SIM card.**

   ▸ **When the entered PIN code or handset code is accepted, the phone will automatically search for the designated network. After a few seconds, your phone will show the standby mode.**

2. To power off the phone, press and hold the **End Key** from the standby mode.

Charging

Your phone is powered by a rechargeable battery. The battery is not fully charged when first unpacked, but there may be enough power to power your phone on. You should use it up completely before charging the battery for the first time. Charge the battery with the procedure indicated below.

1. Push down the USB port cover.

2. Insert the charger's USB adapter into the USB port.

3. Connect the charger to a standard AC wall outlet.
4. Remove the charger from both the wall outlet and the phone once the charging completed.

NOTE Notes:

· **Make sure that the adapter is inserted into the correct position. Do not force the connector into the port.**

· **The battery will be fully charged for 3~4 hours.**

· **Use the charger provided by the original provider. Using unapproved charger may cause danger and violate the authorization and warranty rules of the phone.**

· **If the phone is over-used in shortage of battery or not used for a long time, the screen may not display the charge indicator until it is continues charged for 10 to 40 minutes.**

· **For maximum battery performance, it is recommended that you completely charge the battery before using the phone for the first time. A new battery's full performance is achieved only after three complete charge and discharge cycles.**

· **Once the charging is complete, remove the charger from both the power outlet and the phone.**

· **To charge the battery, you can use the provided charger or the USB data cable.**

· **Charging is only possible within a temperature range of 0℃ to 45℃.**

Setting date and time

Please close network time first.

1. In standby mode, press **OK Key [Menu]** to enter main menu.

2. Select **Settings > Handset > Time and Date** to set the time and date.

Keypad lock

Use the keypad lock to prevent the keys from being accidentally pressed.

1. You can select **OK Key [Menu] > Settings > Handset > Keylock** and select **Auto keylock OFF** to lock keypad manually.

2. You can select **OK Key [Menu] > Settings > Handset > Keylock** and set the keypad locking automatically as 10 seconds, 15 seconds, 30 seconds or 60 seconds.

3. In standby mode, press and hold *** Key** to lock keypad.

   If you want to unlock the keypad, press and hold *** Key** to unlock.

Tips:

· **When the keys are locked,** is shown on the display.

· **If the call is coming when the keypad is locked, you can press Voice Call Key to answer. After ending or rejecting the call, the keypad will be locked automatically.**

· **When the keypad lock is on, calls may be possible to the official emergency number programmed into your device.**

Quick operation

Standby mode

From the standby mode press **OK Key** to access **Main Menu**:

Arrow keys

Use the **Arrow Keys** for shortcuts to menu, to move around the **Main Menu** and to Move the cursor.
1	Shortcut to **Calls**
2	Shortcut to **Email**
3	Shortcut to **Contacts**
4	Shortcut to **Message**

Soft keys

The two keys at the top of the keypad are called **Soft Keys**.

The left and right **Soft Keys** are used to choose the options from the bottom of the screen.

Back and exit keys

Press **Clear Key** to go back one step or **End Key** to **exit** to the **Main Menu** or the **standby mode**.

Basic operation

Menu

In standby mode, press **OK Key [Menu]** to enter main menu.

Browser

You can get the latest information from the Internet through your phone.

Internet access may require registration with the service provider.

The browser is activated with the preset option as soon as you call up the function. Browser settings may be specified/pre-assigned by the service provider.

Messages

SMS (Short Messaging Service) and EMS (Enhanced Message Service) allow you to send text messages

and manage the messages that you sent and received.

You can also send and receive MMS (Multimedia Message Service) messages. MMS enables you to send messages with images, sounds and texts. Consult your service provider whether this service is available. You may need to register separately for this service.

Calls

You can check the phone numbers of missed, received, and dialed voice calls.

Multimedia

You can take photos or videos through camera, record audios, or listen to the radio, and so on.

WIND

STK service appear on your screen only if your (U)SIM card provides this function. For further details, please contact your service provider.

Tools

The **Tools** include **File Manager**, **Bluetooth**, **Alarm**, **Calendar**, **Calculator**, and so on.

You can connect your phone with another bluetooth device through **Bluetooth**.

Downloads & Apps

You can download the applications or games to your phone.

Contacts

You can store contacts with a variety of phone and fax numbers as well as additional address details.

The phone can store up to 500 entries. The capacity of a phone book on your (U)SIM card depends on the type of (U)SIM card provided by your network operator.

Settings

You can set or personalize your phone.

Navigating your phone

The phone features, various functions and settings organized in menus and submenus. To select a function from menus:

1. In standby mode, press **OK Key [Menu]** to open main menu.

2. Use **Navigation Keys** to scroll up, down, right or left to select a menu.

   For example, scroll to **Settings**.

3. Press **OK Key** to enter the menu. At this time, you are in **Screen** tab.

4. Press **Up Key** or **Down Key** to scroll to a submenu, for example **Backlight timers**.

5. Press **OK Key** to confirm selection.

6. Press **Up Key** or **Down Key** to scroll to the desired option, for example, **Halflight duration**.

7. Press **Left Key** or **Right Key** to scroll to the desired option, for example, **15 seconds**.

8. Press **OK Key [Save]** to confirm selection.

Tips:

- **If a number is shown before an option in menu list, you can access the option quickly by pressing the corresponding number key.**

- **In this user manual, the steps needed to reach a menu are shown in a condensed form, for example: Settings > Backlight timers > Halflight duration > 15 seconds.**

- **Some options are organized in tabs. Press Left Key or Right Key to switch to different tabs.**

Making a call

1. If required press *** key** twice quickly for the international prefix "+".

2. Enter the number on the keypad and press **Voice Call Key** to make a call.

- When the call is connected, you can press **OK Key** for **Speaker** mode.
- Press **End Key** to end the call.

Receiving a call

When you receive an incoming voice call, the ring tone, illumination and vibrate function will activate (depending on your current profile setting).

1. Press **Voice Call Key** or **OK Key** to answer.

2. Press **Left Soft key** or **End Key** to reject the call.

- When the call is connected you can press **OK Key** for **Speaker** mode.
- Press **End Key** to end the call.

Obtain the help through your phone

Your phone has been preloaded the help information about some application programs. Please read these information, you can obtain the help about these applications.

Obtain the help from the user manual

Please read the user manual for keys and parts information and instructions for setting up the device for use.

C h a p t e r 2

Text input

Text mode

Your mobile phone provides the following input methods: En input, ABC input, abc input and number input.

Currency text mode

When you are in a field that allows characters to be entered, you will notice the text input mode indicator in the upper right corner of the display.

Changing mode

Press **# Key** repeatedly to select an input method.

ABC/abc mode

1. Press a number key (**2~9**) repeatedly until the desired character appears on the screen. Press once to input the first letter on the keypad, press twice quickly to input the second letter, and so on.

2. Press **0** key to add a space.

3. Press **0** key twice quickly to enter 0.

Number mode

When the input method icon is shown as "**123**", input numbers directly with number keys.

Tips:

While using number input, you need to switch to other text input methods in order to insert a space by pressing number key 0.

Predictive text mode

The predictive text method is based on a built-in dictionary and generates words from the combination of letters pressed.

1. Press each key associated with the letter you want to enter only once. The letters you have entered appear on the display. The candidate words change with each key you press.

2. When the candidate words are displayed, press **Up Key** or **Down Key** to highlight the desired candidate word and press **OK Key [OK]** to confirm.

3. Press number key **0** to insert space, or press *** Key** to select symbols.

4. Press **Clear Key** to delete the letter left of the cursor. Press and hold **Clear Key** to delete all entered text left of the cursor.

Special symbols

1. Press *** Key**.

2. Use **Navigation Keys** to select symbol.

3. Press **OK Key [OK]** to confirm.

C h a p t e r 3

Calls

Voice calls

You can call the numbers of the other party directly or you can make a voice call through contacts, calls log, speed dial numbers.

Making a call

1. In standby mode, enter a phone number.

2. Press **Voice Call Key** to make a voice call.

Press **End Key** to end the call.

Making a call from contacts

1. In standby mode, press **OK Key [Menu]** and select **Contacts**.

   Or press **Down Key** directly to enter **Contacts** in standby mode.

2. Use **Navigation Keys** to select a contact.

3. Press **Voice Call Key** to make a voice call.

Press **End Key** to end the call.

Making a call from call history

1. In standby mode, press **Voice Call Key** to display all calls.

2. Use **Up Key** or **Down Key** to select a number.

3. Press **Voice Call Key** to make a voice call.

Press **End Key** to end the call.

Making a speed dial

Notes:

The number key 1 is reserved for the voicemail number.

In standby mode, press and hold the corresponding number key (**2~9**) in the speed dial list to make the call.

Press **End Key** to end the call.

Setting speed dial

1. In standby mode, press **OK Key [Menu]** and select **Contacts**.

2. Use **Navigation Keys** to select a contact and select **Left Soft key [Options] > Speed Dial**.

3. Press **Up Key** or **Down Key** to select a number.

4. Press **OK Key [Setup]**.

5. Press **Clear Key** to complete the setting and return to the upper menu.

    Or press **End Key** to return to the main menu.

Receiving calls

When the voice call is coming, your phone will ring or vibrate or show the animated cartoon (Please see **Personalize your phone > Profiles**). If the caller has the Calling Line Identification (CLI) facility, the caller number appears on the screen.

Press **Voice Call Key** or **OK Key [Loudsp.]** to answer the call.

Tips:

You can press the button on the headset to answer the call when you connect the headset to your phone.

Press **End Key** to end the call.

Setting ring for coming call

1. In standby mode, press **OK Key [Menu]** and select **Settings > Profiles**.

2. Use **Up Key** or **Down Key** to select the profile.

3. Press **Right Soft Key [Edit]** to edit the selected profile.

4. Select **Voicecall ringtone**.

5. Press **OK Key [Modify]** to modify the ring.

6. Select the audio file in **File Manager** and press **OK Key [Set]** to save the setting.

- ‣ **Hold /Active**: Put the current call on hold or retrieve the call.
- ‣ **End call**: End current call.
- ‣ **Record**: Record the current call, and you can press **OK Key [Stop]** to stop recording.
- ‣ **DTMF off/on**: Enable or disable sending DTMF tone.
- ‣ **Message**: Switch to message interface during a call.
- ‣ **Contacts**: Switch to Contacts interface during a call.
- ‣ **Browser**: You can browse internet by this option while talking.

Call history

In standby mode, select **OK Key [Menu] > Calls** to check the calls log and calls duration.

Viewing recent call history

1. Select **All calls** to view all calls log.

2. Select **Missed calls** to view the missed calls log.

3. Select **Received calls** to view the received calls log.

4. Select **Dialed calls** to view the dialed calls log.

Deleting call history

1. Use **Up Key** or **Down Key** to select the type of calls log in **Call log** tab.

2. Press **OK Key [OK]** to open the log.

3. Use **Up Key** or **Down Key** to select the call log you want to delete.

4. Press **Left Soft Key [Options]** and select **Delete** to delete the log.

5. Press **Left Soft Key [Yes]** to confirm to delete.

Call time

Viewing call duration

Press **OK Key [OK]** to open the **Call duration** in **Calls info.** tab. You can check the Last call duration and All calls duration.

Viewing amount call time

You can check the amount call time in **Call duration**.

Clean call time

1. In **Call duration**, press **Right Soft Key [Clear]**

2. Enter handset lock code.

Tips:

The default handset lock code is 0000.

3. Press **OK Key [OK]** to confirm to clear.

Call settings

Starting call divert

Call divert allows you to divert your incoming calls to another phone number. For details, contact your service provider.

1. In standby mode, press **OK Key [Menu]** to enter main menu.

2. Select **Settings > Call > Call divert** for more options.

‣ **Always**

‣ **When busy**

‣ **When no reply**

‣ **When unreachable**

3. Select one option, press **OK Key** and select **Activate** to register the corresponding service.

4. Enter phone number you want to divert to.

Or press **Left Soft Key [Contacts]** to select one contact as the number you want to divert to.

5. Press **OK Key [OK]** to confirm and select which service (**All voice calls**) you want to divert.

6. After few seconds, the result will be shown to you.

Call divert always

Divert all incoming calls unconditionally.

Call divert when busy

Divert incoming calls when the line is busy.

Call divert when no reply

Divert calls when there is no answer.

Call divert when unreachable

Divert calls when the phone is turned off or the phone is not in an area covered by service network.

Cancelling call divert

When your phone has activated the **Call divert** function, if you want cancel it, you should do as follows:

1. In standby mode, press **OK Key [Menu]** to enter main menu.

2. Select **Settings > Call > Call divert > Cancel all call diverts**, and press **OK Key** to confirm.

All settings about divert are cancelled.

Starting call waiting

If there is an incoming call while you are on another call, the phone notifies you with a call waiting tone. It shows the number/name of the waiting call, and this function is a network service.

1. In standby mode, press **OK Key [Menu]** to enter main menu.

2. Select **Settings > Call > Call waiting**.

3. Press **OK Key [OK]** and select **Activate** to register the corresponding service.

4. After few seconds, the result will be shown to you.

Starting call barring

Call barring (network service) allows you to restrict the calls that you make or receive with the device. To change the settings, you need the network password from your service provider.

1. In standby mode, press **OK Key [Menu]** to enter main menu.

2. Select **Settings > Call > Call barring** for following options:

‣ **All Outgoing**

‣ **International Outgoing**

‣ **International Outgoing (except to home country)**

‣ **All Incoming**

‣ **Incoming (when roaming)**

3. Select one option, press **OK Key [OK]** and select **Activate** to register the corresponding service.

4. Enter the network password.

5. Press **OK Key [OK]** to confirm and select which service (**All voice calls**) you want to restrict.

6. After few seconds, the result will be shown to you.

Bar all outgoing calls

Calls can not be made.

Bar international outgoing calls

International calls can not be made.

Bar international outgoing calls (except to home country)

When abroad, calls can be made only to numbers within the current country and to your home country, where your home network operator is located.

Bar all incoming calls

Calls cannot be received.

Bar incoming calls (when roaming)

Calls cannot be received when you are using your phone outside your home service area.

Cancelling all call barring

When your phone has activated the **Call barring** function, if you want cancel it, you should do as follows:

1. In standby mode, press **OK Key [Menu]** to enter main menu.

2. Select **Settings > Call > Call barring**.

3. Select **Cancel all call barring**.

4. Press **OK Key** and enter the net password.

5. Press **OK Key** to confirm.

All settings about barring are canceled.

Change password of call bar

1. In standby mode, press **OK Key [Menu]** to enter main menu.

2. Select **Settings > Call > Call barring**.

3. Select **Change password** and press **OK Key**.

4. Enter the old password and press **OK Key** to confirm.

5. Enter the new password and press **OK Key** to confirm.

6. Enter the new password again and press **OK Key** to confirm.

Send my number

This function allows you to send or hide your number when making calls. You can also select **Set by network**, then the network will make the choice to show/hide the phone number. This function requires network to support.

Any key to answer

If active **Any key to answer** function, you can answer an incoming call by pressing any key except **End key**, **Clear key**, **Volume Keys**, **Camera Key**, **Left soft key** and **Right soft key**.

C h a p t e r   4

Messages

Connectivity

Mobile network select

Your mobile phone supports to register on network automatically, detailed please consult your service provider. If the phone fails to register on network, you should attempt to register on network manually.

Registering to mobile network

Firstly please confirm the following three items:

• Insert the valid (U)SIM card.

• The network signal can be properly received.

• Power on the phone.

Generally the phone can search for the network automatically after power on. When the phone registered to the network successfully, the name or logo of service provider will be appeared on the screen. If fails to register network, please attempt to following methods:

1. In standby mode, press **OK Key [Menu]** to enter main menu.

2. Select **Settings > Handset > Network settings**, set **Preferred Mode**, **Preferred Band** and **Preferred Selection**, the further description is shown in the table below:

Network		Descriptions
Preferred Mode	Automatic	Search for available network automatically.
	GSM	Registered to 2G network manually.
	UMTS	Registered to 3G network manually.
Preferred Mode		Select the available band.
Preferred Selection	Automatic	The phone will search for available network automatically after power on.
	Manual	The phone will list all networks for you to choose from after power on.

These parameters maybe not identical with your phone, please refer to the real object.

3. Press **OK Key [OK]** to save.

Attaching GPRS network

Please confirm following items firstly:

• Insert the valid (U)SIM card.

• The network signal can be properly received.

• Power on the phone.

• Obtain **Access point settings** parameters from your service provider.

With this service you can receive and send MMS after your phone accesses internet successfully, and this service also requires your service provider to active data service. Detailed please consult your service provider.

1. In standby mode, press **OK Key [Menu]** to enter main menu.

2. Select **Settings > Handset > Access point settings**.

3. Press **Left Soft Key [Add]**, and set the related parameters.

4. Press **OK Key [OK]** to save the settings.

Managing removable disk

Firstly please insert the available external memory card.

1. In standby mode, press **OK Key [Menu]** to enter main menu.

2. Select **Tools > File Manager > Memory card**.

3. Use **Up Key** or **Down Key** to highlight the desired file.

4. Press **Left Soft Key [Options]** to do the following operations: Delete, Rename, Send, Move, and Space information and so on.

Bluetooth

Your phone includes Bluetooth used to connect your handset to wireless headsets. You can also transfer files between your phone and other Bluetooth devices such as another phone or a laptop. Not all applications or devices can be supported as Bluetooth is an open forum and different manufacturers adopt different standards and implementation.

Setting Bluetooth attribute

The default bluetooth function is disabled for the phone. If you enable bluetooth and power off the phone, this function will be disabled. After you restart the phone, this function will be enabled automatically.

1. In standby mode, press **OK Key [Menu]** to enter main menu.

2. Select **Tools > Bluetooth > Bluetooth manager** and press **OK Key [OK]**.

3. Select Bluetooth switch, Bluetooth visible switch, and enter Phone name.

Notes:

Select On to allow your mobile phone to be found by other compatible devices, and you can also send files between your phone and other bluetooth device.

4. After complete the settings, press **OK Key [OK]** to save.

My devices

1. In standby mode, press **OK Key [Menu]** to enter main menu.

2. Select **Tools > Bluetooth > My devices**.

3. Press **Right Soft Key [Search]** to search the available blutetooth devices.

4. Select one device from the displayed list and press **OK Key** to confirm.

5. Enter the pass code when asked for permission to connect to the device. After the paired device verify the pass code, the device will be added successfully.

Sending data

Firstly please confirm the following two items:

• Enable bluetooth function.

• The paired device is visible.

1. Select your desired file, and select **Left Soft Key [Options] > Send > Via Bluetooth**.

2. Select the aim device from the device list, and press **OK Key [Send]** to send.

Receiving data

Firstly please enable Bluetooth function.

1. If the paired device tries to send a file to your phone, one popup dialogue will appear in your screen.

2. Press **Left Soft Key [Yes]** to accept the incoming file, or press **Right Soft Key [No]** to reject the incoming file.

Modem function

Notes:

Please confirm :

• **Insert valid (U)SIM card.**

• **GPRS configuration or dialing connection is available.**

Use the parameters obtained from your service provider to complete the modem settings, connect your phone to computer with supplied data cable , then your phone can work as one external modem for the computer. Detailed please consult your service provider.

C h a p t e r **12**

Phone Security

Phone password

Handset password can protect your handset efficiently and avoid illegal usage. If handset password protection is activated, you should input the correct password in handset start-up.

• For new bought handset, the protection function is not activated and the default password is 0000.

• In standby mode, select **Menu > Settings > Security > Enable PIN codes > Handset lock code** to start or stop password protection.

• In standby mode, select **Menu > Settings > Security > Change PIN codes > Handset lock code** to change handset password. It is suggested to change the password according to your requirement.

Notes:

Please remember the password you set, otherwise your handset can not be used normally, need to contact your service provider.

PIN codes

PIN code is the personal identification code of (U)SIM card, used to avoid illegal usage for your (U)SIM card. Once PIN code is started, the correct PIN code should be inputted in handset start up, otherwise the handset can only execute emergency call.

• For the new bought card, the default code is supplied by the service provider.

• In standby mode, select **Menu > Settings > Security > Enable PIN codes > PIN code** to start or stop PIN code.

• In standby mode, select **Menu > Settings > Security > Change PIN codes > PIN code** to change PIN code.

• If input wrong PIN code continuously for three times, the handset will lock the (U)SIM card and prompt you to input PUK code to unlock.

Notes:

If you change PIN code, please remember it clearly.

PIN2 is needed for some settings. Proceed as with PIN code.

PUK code is the specified unlock code for (U)SIM card, when (U)SIM card is locked, input the correct PUK code and then input the new set PIN code, (U)SIM card then can be used normally.

• PUK code may be supplied with the new bought card, the detail can refer to the service provider.

• PUK code can only be inputted continuously for 10 times, if input wrong PIN code for 10 times, (U)SIM card will be locked indefinitely.

Notes:

If PUK code is supplied with the new bought card, please keep it safely.

PC Software Join Me

Installing Join Me

This software only supports Windows XP (SP2&SP3), Windows 2000 (SP4) , Microsoft Vista and Windows 7, does not support Macintosh OS or Windows Me, 98, 95.

1. Insert CD to computer CD driver.

2. The installation program will run automatically. If not run, please browser your CD and double click **Setup.exe** file.

3. Install software according to the displayed prompt.

4. After installation, connect handset to your computer with USB data cable.

5. The computer will install driver program automatically.

6. Double click desktop icon and run Join Me program.

Uninstalling Join Me

1. Select **Start** > **Program** > **Join ME** > **Uninstall Join ME**

 **Tips:**

   Before uninstall, please close the program.

2. Complete the uninstallation according to the prompt information.

Running Join Me

Before running Join Me, please confirm:

• Your handset is connected to the computer correctly.

• Power on your handset.

1. Double click Join Me icon in desktop.

2. In Handset selection dialog, select your current handset type.

3. Press Connection button, Join ME will connect your handset automatically. If the connection succeeds, in Windows status bar icon will be displayed.

Internet by PC

You can use the phone as a modem to connect a computer to the internet.

Setting PC connection

Make sure the phone is switched on and connected to the computer

1. In standby mode, press **OK Key [Menu]** to enter main menu.

2. Select **Settings > Handset > PC Connection > USB** and press **OK Key [OK]**.

3. Use **Up Key** to select **Modem setting** and press **OK Key [OK]**.

4. Enter the modem related information and press **OK Key [OK]** to save.

NOTE **Notes:**

For The detail setting, please consult your service provider.

Connecting your PC to Internet

Before the connection, please confirm:

• Your handset is connected with Join Me software.

• The network and modem is set correctly

1. In Join Me software interface select the **Internet** tab.

2. Press **Connect** button to Internet go online.

Viewing Internet log

You can view internet log by month or date.

1. In Join Me software interface, select **Internet** tab.

2. Select view condition.

 ▸ View by month includes: All Records, Last Month Records and This Month Records.

 ▸ View by date: select start date and end date.

3. Click **Search** button, the view result will be displayed.

SMS by PC

With the help of Join Me, you can create, edit and delete SMS. You can also manage SMS in your handset and (U)SIM card.

Sending SMS

1. Select the **Message** tab.

2. Click the **New** button to draft an SMS. Or select **File > New Message** to draft an SMS, and the new message window will appear.

3. Click 🔍 to select a contact from **Local**, **Phone** or **(U)SIM card**.

4. Select your desired contacts and press the right arrow to choose.

5. Multiple contacts can be chosen, click **OK** to continue.

6. Enter your messages in text entry field.

7. Click **Send** button to send the SMS.

Tips:

If the handset is not connected with computer correctly, new SMS can only be saved in drafts.

You can enter the receiver number directly.

Receiving SMS

1. In Join Me interface, select **Message** tab.

2. In the left fold structure tree, select **Phone > Inbox**.

3. In SMS list, select the objective one and the SMS content will be displayed in **Detail information** field.

Managing SMS box

You can manage your SMS by the following operations.

• **Reply**: reply for the selected SMS.

• **Forward**: send the selected SMS to others.

• **Delete**: delete the selected SMS.

• **Save as**: Save the selected SMS in the computer.

Contacts by PC

With the help of Join Me, you can manage the contacts in computer, handset or (U)SIM card, the operation includes: **New**, **Edit**, **Delete**, **Save as** and **Import**.

New contact

1. Click **New** button and select **New Contact**, and the **New Contact** windows will appear.

2. Select save position, including: **Local**, **Phone**, or **(U)SIM**.

3. Complete the required information of contact.

4. Click **Save** button to finish.

Tips:

If your handset is not connected with Join Me software correctly, the new contact can only be saved in computer.

Editing a contact

1. Select **Phonebook** tab.

2. Select the desired contact from the list.

3. Double click this record, or click **Edit** button to access **Edit contact** interface.

4. Complete to edit the contact information.

5. Press **Save** button to finish.

Synchronizing contacts

This service enables you to downloading contacts information from **Phone** to **PC**.

1. Select **Tools > Load**, and the **Downloading Data** window will appear.

2. Select **Phonebook**.

3. Click **OK** button, Join Me software will finish synchronization automatically.

Import contacts from Microsoft Outlook

Notes:

Only contacts in the root folder of Outlook will be copied.

1. Launch Microsoft Outlook.

2. Make sure you are on the **Phonebook** tab in Join Me.

3. Right click anywhere on the contacts grid and select **Import From Microsoft Outlook**, and the following fields are imported from outlook to Join Me:

Outlook	Join Me
Full Name	Name

Care and maintenance

Genera care

• Do not allow the handset, battery or accessories to come into contact with liquids or moisture at any time. Do not immerse the handset in any liquid.

• Do not place the handset alongside computer disks, credit cards, travel cards and other magnetic media. The information contained on disks or cards may be affected by the handset.

• Do not place anything in the folded handset.

• Do not paint the handset.

• Do not leave the handset or the battery in places where the temperature could exceed 45 °C, e.g. on a car dashboard or a windowsill, behind glass in direct sunlight, etc.

• Do not remove the handset's battery while the handset is switched on.

• Take care not to allow metal objects, such as coins or key rings to contact or short-circuit the battery terminals.

• Do not dispose of battery packs in a fire. The handset's Li-ION batteries may be safely disposed of at a Li-ION recycling point.

• Do not put the handset's battery in your mouth, as battery electrolytes may be toxic if swallowed.

• Do not attempt to dismantle the handset or any of its accessories.

• This equipment is fitted with an internal battery, take it to a qualified service engineer when the replacement of the battery is required.

• There is a risk of explosion if the battery is replaced with an incorrect battery type. Dispose of the used battery in accordance with the manufacturer's instructions.

• Do not put a battery into a microwave oven, dryer, or high-pressure container.

• Do not contact battery directly to an electric outlet or cigarette lighter charger. Use only approved charger units.

• Do not pierce battery with a sharp object such as a needle.

• When the battery is thrown away, be sure it is non-conducting by applying vinyl tape to the (+) and (-) terminals.

• Do not disassemble or modify the battery.

• Do not drop, throw, or subject the handset to rough treatment.

• Stop using the battery if abnormal heat, odor, discoloration, deformation, or abnormal condition is detected during use, charge, or storage.

• In the unlikely event of a battery leak, keep the battery discharge away from your eyes or skin. If the leakage does come into contact with the eyes or skin, please flush thoroughly in clean water and consult with a doctor.

• Do not use a damaged or deformed battery.

• Do not solder a battery directly.

• Remove the battery whose life cycle has expired from equipment immediately.

• The earpiece may become warm during normal use. Also, the handset itself may become warm while the battery is being charged.

- When a handset is in vibration mode, the vibration can sometimes cause the handset to move.

- Be careful not to place the handset near heat sources (such as a heater) or too close to the edge of the table.

- Use a damp or anti-static cloth to clean the handset. Do not use an ordinary dry cloth or electrostatic cloth. Do not use chemical or abrasive cleaners as these could damage the casing.

- Third party equipment: The use of third party equipment, cables or accessories, not made or authorized by manufacturer, may invalidate the warranty of your handset and also adversely affect the phone's safety/operation.

- Remember to make backup copies of all important data on your handset.

- Remember to recycle: the cardboard packing supplied with this handset is ideal for recycling.

⚠️ Warning:

Caution explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.

Aircraft safety

- Power off your phone before the airplane takes off. In order to protect airplane's communication system from interference, it is prohibited to use mobile phone in flight. If you want to use mobile phone before the airplane takes off, you should get aircrew's permission according to safety regulations.

- If the mobile phone has the function of automatic timing power-on, please check your alarm setting to ensure that your phone will not be automatically powered on during the flight.

Hospital safety

- Switch off your phone and remove the battery in areas where the use of handsets is prohibited.

- Follow the instructions given by the respective medical facility regarding the use of handsets on their premises.

General guidelines

- In some countries national law unapproved private copying of copyrighted material. Please check the national legislation of the applicable country concerning the use of such material.

- Many jurisdictions have laws and regulations about taking pictures in public or private areas and regarding the processing and further use of such pictures. The manufacturer encourages its customers to obey all laws and to respect the personal rights of others.

- Please check roaming agreement availability with your service provider.

- The use of mobile phones is not allowed in some radiation sensitive areas, such as hospitals, research centers and airplanes. The user is responsible to power-off the device. If there is any uncertainty, you should remove the battery from the handset.

- Observe any signs that indicate powering off your handsets, such as those near gas stations, or explosives and power off the handset/device immediately.

- If you have a heart condition, be careful with the settings of call vibration or tone volume.

- Do not allow children to play with the handset, charger or batteries.

- Do not use the handset where blasting is in progress.

• Do not try to make a call or conversation while the temperature of charging battery is above 45°C.

• Take care not to put your handset in the back pocket of your trousers or skirt and then sit on it. Also, do not put your phone at the bottom of bag where it may subject to excessive weight or pressure. Doing so may damage the LCD and camera lens and cause them malfunction.

• The operation of some medical electronic devices, such as hearing aids and pacemakers, may be affected if a handset is used next to them. Observe any caution signs and the manufacturer's recommendations.

• Do not leave the handset discharged or without a battery for a long time, otherwise some data may be erased.

• Your phone contains metal, which may cause you an itch, a rash or eczema depending on your physical condition.

Road safety

• You must exercise proper control of your vehicle at all times. Give your full attention to driving.

• Observe all of the recommendations contained in your local traffic safety documentation.

• Pull off the road and park before making or answering a call, if driving conditions require so.

• Check if local laws and/or regulations restrict the use of handsets while driving.

• You MUST NOT stop on the hard shoulder of a motorway to answer or make a call, except in an emergency.

• Switch off your handset at a refueling point, such as a gas station, even if you are not refueling your own car.

• Do not store or carry flammable or explosive materials in the same compartment as the handset.

• Electronic vehicle systems, such as anti-lock brakes, speed control and fuel injection systems are not normally affected by radio transmissions. The manufacturer of such equipment can advise if it is adequately shielded from radio transmissions. If you suspect vehicle problems caused by radio transmissions, consult your dealer and do not switch on the handset until it has been checked by qualified approved installers.

Vehicles equipped with an airbag

An airbag inflates with great force. Do not place objects, including either installed or portable wireless equipment, in the area over the airbag or in the airbag deployment area. If in-vehicle wireless equipment is improperly installed and the airbag inflates, serious injury could result.

Third party equipment

The use of third party equipment, cables or accessories, not made or authorized by the manufacturer, may invalidate the warranty of your handset and also adversely affect the handset's operation. For example, use only the manufacturer mains cable supplied with the AC charger.

Emergency service

NOTE **Notes:**

Emergency service numbers vary by country. It helps you get emergency service from the operator.

To make an emergency call in any country:

1. Ensure that your handset is on and in service.

2. Press **End Key** as many times as needed to clear the display and ready the device for calls.

3. Enter the official emergency number for your present location, for example, 112 (the international emergency number).

   Enter a local emergency service number, such as 112 (the international emergency number).

4. Press **Call key** to dial the number. Follow instructions received and do not end the call until told to do so.

When the (U)SIM card is not inserted or when the dial lock function is on, press **Right Soft Key [SOS]** and then enter the official emergency number for your present location. Press **Call Key** or **OK key [Call]** to dial the number.

NOTE **Notes:**

• **Tell the operator which service you require: Police, Ambulance, Fire Brigade, Coastguard or Mountain Rescue Service. Tell them where you are and remain stationary to maintain contact if possible.**

• **Due to the nature of the cellular system, the connection of emergency calls cannot be guaranteed. You should never rely solely on any wireless device for essential communications like medical emergencies.**

Declaration of conformity

We declare under our sole responsibility that the product(s) detailed in this manual, and in combination with our accessories, conform to the essential requirements of European Union Directive 1999/5/EC Radio and Telecommunications Terminal Equipment Directive requirements 3.1(a), 3.1(b), 3.2..

Information on the privacy

Camera usage and photo/audio/video recordings carried out with the handset can offend the confidentiality of the subjects. The user therefore is held to respect legislation in confidentiality matter and remains the only responsible subject in case of eventual violations of the enforced norm.

Copyright notice

The video/audio recordings you make/download are protected by copyright laws. They are for personal use only and must not be otherwise used without the permission of the copyright owner.

Troubleshooting and FAQ's

Please check the manual thoroughly before contacting your service provider

Symptom	Solution
No incoming ring or alarm tone	Check the ring tone and ring volume settings under Profiles Check the handset is not muted (Long press the **# key**)
(No) keytones when pressing keys	Check the key tone settings in the current profile.
How do I extend the incoming ring time?	This is not a handset setting. Please contact your Service Provider to extend the ringing time.
A phone number cannot be dialled	Check for network coverage Check whether any call restrictions are set.
Short messages cannot be sent or received	See Text Message Settings and check the SMS centre number is correct. Contact your service provider for more details.
MMS messages cannot be sent or received	Your subscription does not include data services. Check with your service provider.
How do I switch off Predictive Text?	The **# key** is used to toggle between different modes.
I cannot connect to Join Me	Check: **Menu > Configuration** tab right to **Handset > PC Connection > USB** Uninstall and re-install the CD software.
My phone is slow to respond, handset storage problems	Restart your phone every day to refresh the memory Delete or archive old SMS messages and other content **Restore default settings**: **Menu > Configuration** tab right to **Handset > Restore Default > 0000 > Yes**
The battery discharges quickly	Possible network coverage issue. Check the signal strength. With only 1 or 2 bars, the battery has to work harder to maintain network contact. Limit multi-media and Bluetooth usage to save power. The battery may be worn out and needs to be replaced.
I cannot charge the phone	Confirm the charger is properly inserted. Remove the battery, clean the contacts and check it is inserted correctly. The battery may be worn out and needs to be replaced. **Tip**: Charge the phone using the supplied USB cable.
How do I enter text in an SMS?	From the phone number field press the down arrow twice to move into the text area. Use predictive text or abc mode to manually type words.
How do I change the Ringtone?	Edit the current profile and select a new tune from the Audios directory.
The handset switches off after charging.	The handset is charging in the off state. Press and hold the **End key** to switch the handset **ON** or charge it in the **ON** state
The handset switches on automatically	An alarm or calendar event will switch the handset on automatically.
My phone is not able to connect to other Bluetooth devices	Turn Bluetooth on. Set visibility to Show. Possible compatibility issues. Manufacturers incorporate different Bluetooth profiles. Not all functionality is supported.

Symptom	Solution
How do I transfer pictures via Bluetooth to a photo printer (eg Kodak)?	This is not supported due to different Bluetooth profiles. Copy photos using Join Me

Message	Solution
No (U)SIM detected	Check a valid (U)SIM card is inserted See the chapter: **Inserting (U)SIM card.**
Enter PIN code	Enter the correct PIN code supplied by your service provider
Enter PUK code	Contact your service provider to get the PUK code
Enter unlock code	Please contact your service provider
Enter handset lock code	The default handset lock code is 0000

Specifications

Handset specifications are shown in the following table.

Handset Standards	3G WCDMA 2100MHz and AWS 2G GSM 850MHz, 900MHz, 1800MHz and 1900 MHz
Dimensions (H×W×D)	107 mm × 47 mm× 14.5 mm
Weight	Approximately 87g (including battery)
Display	2.0" 262 K LCD color screen
Front camera	0.3 M pixel camera
Back camera	2.0 M pixel camera
Extended memory	8G external memory card
Battery	1000 mA hours, Lithium ion (Li-ion)
Performance	BMP/JPG/GIF image; 3GP/MP4 video; MP3/AMR/WAV/ACC/ACC+ audio; Capture Image: up to 1200x1600, 24b; Capture Video: up to 176 x 144; USB 1.1; JAVA MIDP 2.0; MMS Video and Picture, E-mail, Calendar, Speakerphone, Voice Recorder, Bluetooth; FM
Continuous idle time	Up to 200 hours
Continuous talk time	About 150 minutes
Charge time	Approximately 3~4 hours

Notes:

The phone's talk time and idle time are based on ideal working environments. The use of extended backlighting, browser, and network conditions can reduce battery life and talk/idle time.

Glossary

1. **2G** - Second Generation wireless communication system. 2G system supports low quality voice and low-rate packet-data service. 2G refers to GSM in European countries, and CDMA in America.

2. **3G** - Third Generation wireless communication system. 3G is the next generation wireless communication system that offers real-time video streaming services and high-rate packet-data service. 3G is also known as UMTS (Universal Mobile Telephony System).

3. **Access point** - Access point refers to a point through which users can connect to the network so that the users can use the network services.

4. **MMS (Multimedia Message Service)** - A message service for the handset environment, that allows videos, pictures, audio files and text to be sent between phones and dependent on network provider support, to email addresses

5. **Roaming** - Use of your phone when you are outside your home area, when traveling for example.

6. **(U)SIM** - Universal Subscriber Identity Module. Your (U)SIM is provided by service provider. It carries the authentication and service grade data for the service provider as well as user-specific data such as Contacts and SMS.

7. **Voice mail** - An answering service that automatically answers your calls when you are not available. Others can leave either voice messages for you with this service.

Radio Frequency (RF) Energy

- This model device meets the government's requirements for exposure to radio waves.

- This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government:

- The exposure standard for wireless devices employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg.   *Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the poser required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

- The highest SAR value for the model device as reported to the FCC when worn on the body, as described in this user guide, is 1.260 W/kg (Body-worn measurements differ among device models, depending upon available enhancements and FCC requirements.)

- While there may be differences between the SAR levels of various devices and at various positions, they all meet the government requirement.

- The FCC has granted an Equipment Authorization for this model device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model device is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/fccid after searching on

- FCC ID: XZA-GOWELLG328.

- For body worn operation, this modem has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1.5 cm from the body. Use of other enhancements may not ensure compliance with FCC RF exposure guidelines.

Chapter **20**

FCC Compliance

- This device complies with part 15 of the FCC rules. Operation is subject to the condition that this device does not cause harmful interference.

- This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

     -Reorient or relocate the receiving antenna.

     -Increase the separation between the equipment and receiver.

     -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

     -Consult the dealer or an experienced radio/TV technician for help.

  Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

- The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Information on products disposal

The symbol ⚱ brought back on the equipment indicates that the refusal must be object of "separate collection".

Therefore, the customer will have to confer (or to make to confer) the refusal to the centers of differentiated collection predisposed from the local administrations, or to deliver it to the retailer in exchange of one new equipment purchased.

The differentiated collection of the refusal and the successive operations of treatment, recovery and waste help the production of equipment with recycle material and limit the hazardous effects on the atmosphere and the health eventually caused from one improper management of the refusal.

The illicit disposal of the product by the customer involves the application of the administrative endorsements of which to article 254 and following of the D.Lgs. 152, April 3rd 2006.

According to the article, the 13, D.Lgs. 25th July 2005, n. 151 "Performance of the Directives 2002/95/CE, 2002/96/CE and 2003/108/CE, relative to the reduction of the use of dangerous substances in the equipment electronic electrical workers and, let alone to the disposal of the refusals".
