Statement of HSPA+ and DC-HSDPA

Product description: Mobile Phone

Type designation: 202F

Trademark: ARROWS

The above device (Mobile phone) has HSPA+ and DC-HSDPA function. This HSPA+ and DC-HSDPA function cannot be activated by the user in case the Mobile phone is used or switched on outside of Japan. The HSPA+ and DC-HSDPA function can also not be activated by the user in case the Mobile phone is outside of the service area, or inside the network which has the country code other than the country code of Japan(440) while the Mobile phone is switched on. In both cases, the HSPA+ and DC-HSDPA function is also not activated automatically.

When the Mobile phone is inside the service area of a Mobile phone network, it will check all available cellular networks for the country code (amongst other things). The HSPA+ and DC-HSDPA function will not switch on automatically in case the Mobile phone detects networks having a country code other than the country code of Japan (440).

Also the user access to all functions related to the HSPA+ and DC-HSDPA function will be disabled in case the Mobile phone detects networks having a country code other than the country code of Japan (440).

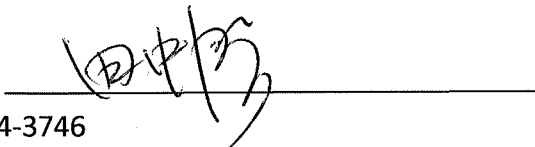

This will prevent the user from manually switching on the HSPA+ and DC-HSDPA function in case the Mobile phone is operated within the service area of a Mobile phone network which does not have the country code of Japan (440).
