

RF exposure evaluation

- a) Type of EUT : TABLET PC
- b) Trade Name : 2OPTOP
- c) Model No. : 2GOSML721
- d) FCC ID : Z4F2GOSML721
- e) Working Frequency : 2412~2462 MHz

For frequency band 2412~2462 MHz, the lowest threshold is:
 $60/f(\text{GHz}) = 60/2.462 = 24.37$

The max output power = 12.84 dBm = 19.23 mW < 60/f(GHz)

Per KDB447498, SAR evaluation is not required
