

Edifier International Limited

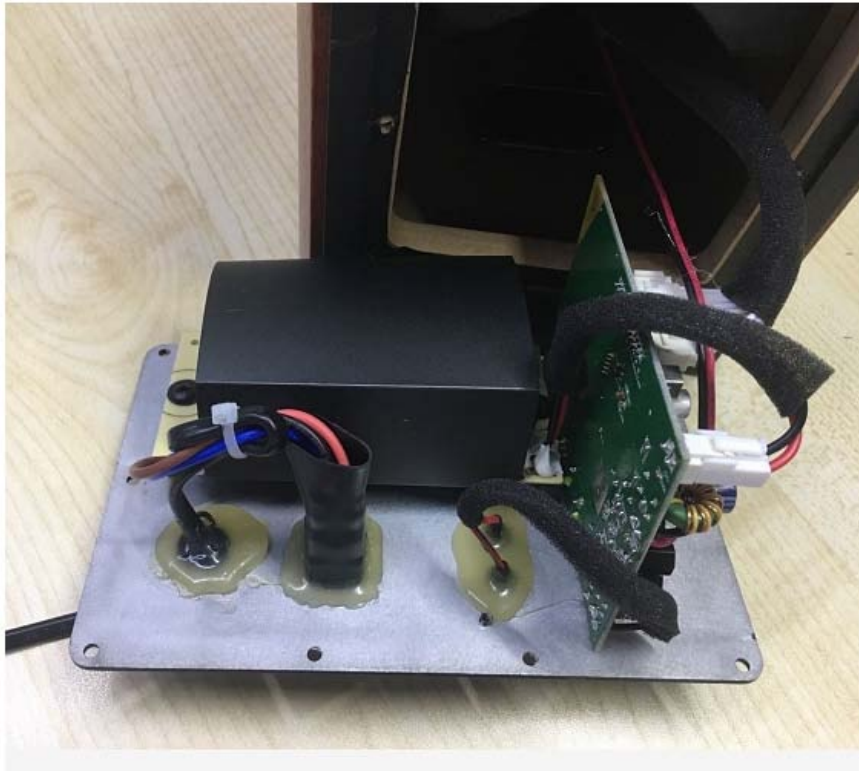

I, the signer, Dingkun Shen

The only differences between the two models are the internal structure. The model is EDF100035, which is exactly the same as the circuit board of EDF100016, except that the appearance, the structure size of the wooden case and the installation position of the circuit board is different. They are electrically identical.

M/N: EDF100016: the power board is installed in the wooden case, and the PCB motherboard is installed vertically.

M/N: EDF100035: the power board is mounted on the rear panel and the PCB motherboard is mounted horizontally

Item Name : Active Speaker
Model Number: EDF100016
Additional Model: EDF100035
