

BLE TPMS SENSOR

TPM202

TPM202631

FCC Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

ISED Statement:

For Canada, the “compliance statement and unlicensed device usage conditions” which must be shown in the user manual has changed.

It should now read like this:

This device contains licence-exempt transmitter(s) that comply with Innovation, Science and Economic Development Canada’s licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) this device may not cause interference,
- (2) this device must accept any interference, including interference that may cause undesired operation of the device.

L’émetteur exempt de licence contenu dans le présent appareil est conforme aux CNR d’Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes :

- 1) L’appareil ne doit pas produire de brouillage;
- 2) L’appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.

- 1) This equipment is not suitable for use in locations where children are likely to be present
- 2) High or low extreme temperatures: -30°C-75°C
- 3) Do not replace the battery with an incorrect type (battery type: CR2050W)
- 4) Do not dispose the battery into fire or a hot oven
- 5) Do not leave the battery in an extremely high temperature
- 6) Do not subject the battery to extremely low air pressure

Product Warning

1. Please do not operate the APP or TPMS receiving device while riding a motorcycle. Failure to concentrate on riding a motorcycle may result in serious consequences such as injury or death. The user will bear all risks and responsibilities!
2. This TPMS Sensor adopts wireless signal transmission. In some case, the system may receive weak signal or no signal due to interference, wrong operation method or wrong installation method. If the APP or TPMS receiving device displays an abnormal icon and emits a warning sound during riding the motorcycle, please move the vehicle away from the current location and check again. There may be other signal

interference nearby, and ride the vehicle to a nearby tire service location for inspection.

3. If the battery status of the TPMS sensor is low (if abnormal conditions exist, the low battery status may make the TPMS sensors emit signals to warn the driver continuously, so that the battery life will be shorter than expected). Please go to the designated installation site for inspection as soon as possible, and check whether the sensor needs to be replaced.
4. Please change the sensor when the low sensor battery warning is displayed, it may cause the TPMS not working normally. The user will bear all risks and responsibilities.
5. When disassembling and installing tires, please avoid collision with the sensor when using tire removal and installation equipment.
6. The use of tire sealants, such as tire sealants filled via the valve, will adversely affect the operation of the sensor. The company is exempt from all consequences
7. Do not place the TPMS sensor in contact with any chemicals, as this may damage the sensor and prevent it from working properly.
8. Do not exceed the speed limit of the product and the vehicle. Exceeding the speed limit may cause damage to the sensor and prevent normal operation.

Although this product has the function of detecting the tire pressure of the vehicle and warning the driver in case of abnormal tire pressure, it cannot be used to replace or reduce the driver's usual care obligations and any inspections or operations that should be performed before or while driving. Drivers should remain alert under any driving conditions, comply with all safe driving standards, and comply with all traffic rules. The company shall not be liable for any damage caused by the driver's failure to comply with the foregoing matters.

Product Part List

TPMS Sensor	x 2
Valve kit	x 2

Tire pressure monitoring sensor installation

- Please go to a qualified service location for TPMS sensor installation and setting.
- When removing or installing tires, the removal tool should avoid the valve position to avoid damage to the TPMS sensor.
