Application Examiner:

Northwest EMC Test report # KMWC0027 was used to support an original grant of certification for FCC ID: ZUQ849144415 issued September 15, 2011. After the grant was issued, KMW U.S.A., INC. determined that the grant should have a slightly increased level of output power.

Subsequent testing and investigation led us to conclude that likely the test data used in the original report # KMC0027 had inaccurate amplitude offset in the spectrum analyzer.

We have issued a revised test report to # KMWC0027 that contains data with accurate amplitude offset in the spectrum analyzer.

Best regards,
